

Doonside Station Upgrade

July Community Notification

The NSW Government is improving accessibility at Doonside Station as part of the Transport Access Program, a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure across the state.

Upcoming work

In July, work at the station will include:

- piling, civil works and concreting for the new lifts and canopies
- demolishing existing stairs and installing new stairs on platforms 3 and 4. Once completed, platforms 3 and 4 will be able to be accessed via the new stairs
- refurbishing inside the station buildings
- modifying the existing station toilet to become a family accessible toilet
- excavating and trenching for new services on Coghlan Crescent, Cross Street and Eastwood Lane
- modifications and structural repairs to the footbridge, ramps and stairs
- installing a project office site compound on School Parade
- mid-week plant and machinery deliveries to the station, scheduled to arrive after the last train and before the first train the next day
- tree trimming and vegetation removal. Landscaping, which will include planting of trees, shrubs and other vegetation will be provided to replace trees removed, at the end of the project
- concrete deliveries via Cross Street, Eastwood Lane and School Parade
- storing of project materials and rail corridor access on Coghlan Crescent, School Parade and Doonside Crescent, opposite Silvereye Court.

How will the work affect you?

There will be excavation and trenching work for new services on Coghlan Crescent, Cross street and Eastwood Lane. Access to footpaths and roads will be maintained during this time. There will also be some structural repairs and refurbishments to the footbridge and ramps, however this work will be done in stages so the footbridge can remain open.

Until **October 2022**, the station toilet will be temporarily closed while we convert it into a new family accessible toilet. During this period a signposted temporary unisex toilet will be available for use by station commuters.

When there is work happening on the station footbridge, there may be times you are asked to wait a short time before crossing safely.

Out-of-hours work

There is no planned work outside of standard construction hours in July, however at different times throughout the project it may be necessary. This allows our team to complete activities safely.

We understand that out-of-hours work may be noisy at times. When it is necessary, we will do everything to lessen the disturbance including turning off vehicles and equipment when not in use and using non-tonal reversing beepers for trucks used on site.

Should unforeseen out-of-hours work arise, affected residents will be notified prior to the work commencing.

Where will the work take place?
