

Transport Access Program

Point Clare Station Upgrade – Project Update August 2022

Lift shaft formwork ready for concrete pour on the Kurrawa Avenue side of Point Clare Station, July 2022

Upcoming work

The Point Clare Station Upgrade continues to progress with underground services installation work at Brisbane Water Drive forecourt and construction at station entries being carried out during July. **Work will continue in August and includes:**

- continued construction of the station services building
- start fit out of lift shafts on both sides of the station
- continued construction of stairs and underpass entry on Kurrawa Avenue side of station
- continued construction of station forecourt pavement work on Brisbane Water Drive
- start construction of station forecourt pavement work on Kurrawa Avenue
- start station services upgrade work across the station precinct.

Equipment to be used includes mobile cranes, excavators, concrete trucks and pumps, delivery trucks, power tools and hand tools.

Station underpass closed – shuttle bus operating

The station underpass will be temporarily closed intermittently during the day for short periods (up to three hours at a time) **throughout August**, to allow for concrete deliveries.

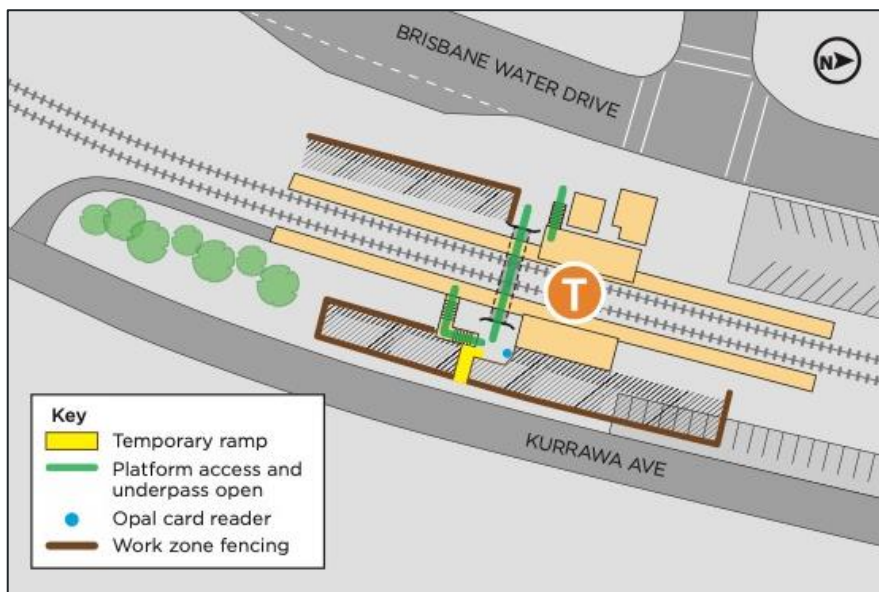

Equipment to be used may include concrete trucks, concrete pumps, excavators, power and hand tools.

A free shuttle bus will provide access between the Brisbane Water Drive and Kurrawa Avenue sides of the station when the station underpass is closed. Traffic control and signage will be in place to help with all temporary changes.

Station underpass access changes to/from Kurrawa Avenue

From **Monday 1 August** there are temporary access changes to enable construction work at the Kurrawa Avenue side of the station this month. There is a temporary ramp in operation at the end of the underpass, near the stairs to/from Platform 1.

Access changes are expected to be in operation for three weeks, weather permitting. Access to the underpass will be via the temporary ramp, as shown in the map below.

Station access changes – removal of ramps to underpass

The existing ramps to the underpass have been removed to allow the construction of the new stairs and lift entries.

Customers with a disability, limited mobility, luggage or prams can call **1800 775 465** at any time to arrange access from one side of the station to the other. This service will be in place until the new accessible lifts are open.

Signage is also in place to help with these temporary changes.

Transport for NSW apologises for the inconvenience and will keep the community informed as the project progresses.

Brisbane Water Drive – temporary footpath changes and parking space closure

From **Monday 1 August**, work to upgrade of the Brisbane Water Drive station forecourt starts and will take about six weeks to complete, weather permitting. The work will be staged to allow for continued pedestrian access to all key station facilities.

Signage will be in place to guide pedestrians around temporary footpath work areas. Pedestrian access to the station and underpass will be maintained at all times.

Three parking spaces in the Brisbane Water Drive commuter car park will be closed from **Monday 1 August** until late October to create a temporary construction site compound for the work. Signage will be in place to help with these temporary changes.

Station toilet closed – temporary toilet available

The existing toilet in the station building will remain closed **until late September 2022** while it is upgraded. Temporary toilets are available for use during station opening hours at the station end of the car park on Brisbane Water Drive.

Signage is in place to help with these temporary changes.

Station design

You can view an updated project map of the station design, or a video demonstrating cross-corridor and cross-platform access, by scanning the QR code or visiting transport.nsw.gov.au/pointclare.
