

Transport Access Program

Point Clare Station Upgrade – Project Update October 2022

New station entry on Kurrawa Avenue with concrete works progressing and lift fit out underway

Upcoming work

The Point Clare Station Upgrade continues to progress with the Brisbane Water Drive forecourt upgrade and fit out of the lift shafts being carried out during September. **Work will continue in October and includes:**

- continued construction of the station services building
- continued fit out of lift shafts on both sides of the station
- continued construction of station forecourt pavement on Brisbane Water Drive
- continued construction of station forecourt pavement on Kurrawa Avenue
- continued work to upgrade station toilet facilities
- continued station services upgrade work across the station precinct.

Equipment to be used includes mobile cranes, excavators, concrete trucks and pumps, delivery trucks, power tools and hand tools.

Station underpass closed – shuttle bus operating

The station underpass will continue to be temporarily closed intermittently during the day for short periods (up to three hours at a time, during off-peak hours) **throughout October**, to allow for concrete deliveries. Equipment to be used may include concrete trucks, concrete pumps, excavators, power and hand tools.

A free shuttle bus will continue to provide access between the Brisbane Water Drive and Kurrawa Avenue sides of the station when the station underpass is closed. Traffic control and signage will be in place to help with all temporary changes.

Station and underpass access assistance – project team available to help

The existing ramps to the underpass have been removed to allow the construction of the new stairs and lift entries. Customers with a disability, limited mobility, luggage or prams can call **1800 775 465** at any time to arrange access from one side of the station to the other. This service will be in place until the new accessible lifts are open. Signage is also in place to help with these temporary changes. Transport for NSW apologises for the inconvenience and will keep the community informed as the project progresses.

Brisbane Water Drive – temporary footpath changes

Due to weather and unexpected ground conditions, upgrade work on the Brisbane Water Drive station forecourt will continue **until early November**, weather permitting. During the footpath work, signage and traffic controllers will be in place to guide pedestrians around temporary work areas.

Pedestrian access to the station and underpass will be maintained at all times.

Station toilet closed – temporary toilet available

The station toilet upgrade work is also ongoing, with the existing toilet in the station building closed **until mid-November 2022**, weather permitting. Temporary toilets are available for use during staffed hours (from 6am to 12:30pm Monday to Friday) at the station end of the car park on Brisbane Water Drive. Signage is in place to help with these temporary changes.

Night works during October

Throughout October, night work for the stormwater installation on Brisbane Water Drive near to the station will be carried out for **no more than two consecutive nights between Monday and Friday** from **6pm to 7am**, weather permitting. This work will occur at night for the safety of workers and the community. Work will involve using an excavator, truck, compaction equipment, crane, task lighting, power and hand tools.

Construction hours

Standard construction hours are from **7am to 6pm Monday to Friday** and **8am to 1pm Saturdays**, excluding public holidays. We will notify nearby residents and businesses in advance if we need to work outside these times.

Sydney Trains staff are on duty at the station from 6am to 12:30pm Monday to Friday.
