

Transport Access Program

Point Clare Station Upgrade Construction update - 20 July

Weekend work – scheduled trackwork 22 July to 25 July

There will be weekend work occurring continuously from **8pm on Friday 22 July until 7am on Monday 25 July**, weather permitting, to construct stairs and underpass entry on Kurrawa Avenue.

As trains are not operating during this scheduled Sydney Trains trackwork weekend, the station and underpass will be closed, and a shuttle bus will be in operation. Signage will be in place in advance to assist with this temporary change.

Station underpass closed and access changes to/from Platform 1

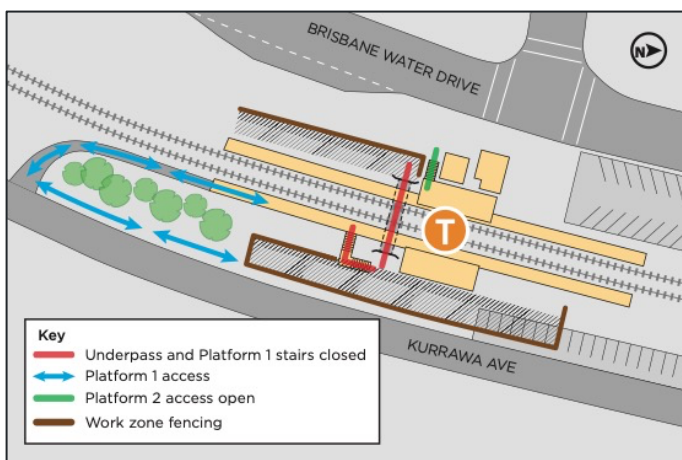

The station underpass will be temporarily closed from **8pm on Friday 22 July until 11pm on Sunday 31 July**, to allow the construction of the underpass entry, new stairs and lift entry on the Kurrawa Avenue side of the station.

While the station underpass is temporarily closed, access to/from Platform 1 from Kurrawa Avenue (including the shuttle bus stop) will change to enable construction work as follows:

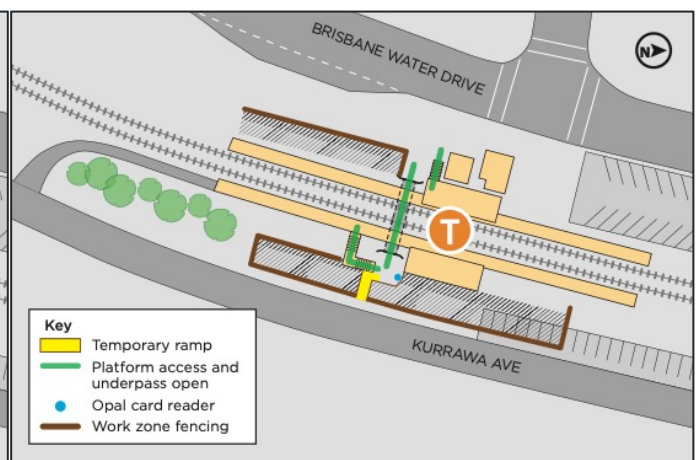

- **Stage one** – access via the southern end of Platform 1. Stage one access is expected to be in operation for three days, weather permitting. See the map below.
- **Stage two** – access via Platform 1 stairs. There will also be a temporary ramp in operation at the end of the underpass, near the stairs to/from Platform 1. Stage two access is expected to be in operation for three weeks, weather permitting. Access to the underpass during Stage two will be via the temporary ramp. See the map below.

Signage will be in place to assist with both stages of temporary access changes.

Station design update

In February 2021, the community was invited to comment on an initial design featuring upgraded ramps from the Kurrawa Avenue and Brisbane Water Drive entries to the station underpass.

As part of the detailed design process, the lift on Brisbane Water Drive was relocated closer to the underpass and stairs to the platform. This change provides more direct and equitable access for all customers to the lift, stairs, and underpass, as well as improved accessibility to the bus stop.

By relocating the lift, and adding a stop at underpass level, the proposed ramp from street level to the underpass on Brisbane Water Drive is no longer required. The revised design best meets the project objectives to make the station more accessible for public transport users, while still maintaining cross-corridor access for the local community via the new lifts.

To see an updated project map, or a video demonstrating cross-corridor and cross-platform access of the updated station design, please visit transport.nsw.gov.au/pointclare.

Station access changes – removal of ramps to underpass

As previously notified, the ramp on Brisbane Water Drive has been removed to allow the construction of the new stairs and lift entries. On **Friday 22 July 2022**, the existing ramp on Kurrawa Avenue will also close.

Due to unforeseen changes to the staging of the project, the new accessible lifts will not be open until later this year.

Customers with a disability, limited mobility, luggage or prams can call **1800 775 465** at any time to arrange access from one side of the station to the other. This service will be in place until the new accessible lifts are open. Signage is also in place to help with these temporary changes.

Transport for NSW apologises for the inconvenience and will keep the community informed as the project progresses.

Construction hours

Standard construction hours are from **7am to 6pm Monday to Friday** and **8am to 1pm Saturdays**, excluding public holidays. We will notify nearby residents and businesses in advance if we need to work outside these times.
