

Transport for NSW

Redfern Station Upgrade

New Southern Concourse

Transport for NSW | August 2022

What happened in July and what is planned next?

During July, work continued on the bridge with the installation of the canopy for the new station entrance in Marian Street.

On Little Eveleigh Street, construction continued for stage two of the new shared zone and paving and finishing works continued on stage one. The Marian Street shared zone is nearing completion with paving complete, finishing work underway and is now open to traffic.

Throughout August, work activities will continue on the New Southern Concourse, new station entrances and shared zones in Little Eveleigh and Marian Streets.

Our standard construction hours are 7am to 6pm Monday to Friday and 8am to 6pm Saturday. Due to unforeseen events such as weather, some construction activities may run slightly past 6pm, however these activities are not expected to be noisy.

Are there activities planned outside of standard construction hours?

Electrical work, delivery of plant and equipment, installation and pre-assembly of bridge components including steelwork, stairs, lifts,

canopies, roof panels and screens, and platform resurfacing will occur during the following times.

- **2am Saturday 6 August to 2am Monday 8 August**
- **2am Saturday 13 August to 2am Monday 15 August**

Service investigation, excavation and stormwater installation will also occur intermittently at the corner of Little Eveleigh Street and Lawson Street on the following dates.

- **8am Saturday 27 August to 6am Monday 29 August**

A single lane closure on Lawson Street will be in place during these times. Traffic control, a detour and signage will be in place to safely direct and assist motorists, cyclists, and pedestrians.

Minor traffic delays may be experienced during the stop and slow traffic arrangement. Please refer to the map on the last page for more information.

If there are weather impacts, the work activities will occur during another weekend however, we will keep the community updated.

Pedestrian access to Platform 10 will be closed between **2am Saturday 30 July and 2am Monday 1 August**. Traffic control and detour signs will be in place to direct pedestrians via Gibbons Street.

Material and equipment removal, deliveries, concrete pouring, relocation of electrical components and testing may also occur up to three nights per week. These work activities are not expected to be noisy.

Why are there activities planned outside of standard construction hours?

Night work is required to be undertaken outside of standard construction hours to ensure the safety of workers, pedestrians and motorists, and to minimise impacts to traffic.

Sometimes out of hours work can be noisy. A noise assessment will be undertaken prior to the work and more information will be provided to impacted residents closer to the date.

Station area and platforms update

During August, work will continue at and around the station area and on platforms. This includes:

- fit out of the lift shafts, stairs, and bridge
- electrical work, including service installation
- concreting work
- installation of steel parts across the bridge and platforms
- roofing work across the bridge and platform canopies.

Work will also continue behind Platform 1 including rock breaking, excavation, concreting, drilling, material removal, and the installation of canopy parts, stairs and a lift shaft.

Little Eveleigh Street update

In August, work activities will continue on Little Eveleigh Street during standard construction hours in the stage two construction area. This work includes:

- underground services exploration
- relocation of existing services
- installation of underground conduits and communication pits
- roadway and footpath excavation including removal of existing asphalt, concrete and kerbs
- backfilling and concreting
- service and stormwater installation and relocation
- kerbing, drain, bollard, pipe, landscaping and pavement installation
- tree and tree roots investigation
- tree and tree stump removal.

During this time, paving and finishing work will also continue in the stage one construction area.

We would like to thank the community for their continued patience and support during construction of the new shared zone.

Work activities will continue at 125-127 Little Eveleigh Street including the removal of materials, installation of external scaffolding, concreting, piling, hammering and service installation. A crane will operate behind Platform 1 to remove and deliver material and equipment into the building.

Service investigation, excavation and stormwater installation will take place within the Wilson Street reserve. The work will be completed in stages to ensure pedestrian and vehicle access is maintained throughout the work activities.

Marian Street update

Work in the Marian Street compound includes the assembly of bridge components, excavation, fit out, tiling and painting of the electrical building, and service connections.

The canopy for the new station entrance and associated steel parts will also be installed within the Marian Street compound area. Cranes will operate within the compound to assist with these work activities.

In August, final work activities will continue in the work area on Marian Street during standard construction hours for the new shared zone. This work includes:

- service stormwater and drainage installation
- pavement sealing and completion, and landscaping.

During August, a **temporary road closure on Rosehill and Marian Streets and removal of 5 parking spaces on Cornwallis Street** will be in place for a period of five consecutive days, **from Monday 1 August to Friday 5 August**.

This is to allow the paving for the shared zone to be sealed. Please refer to the map overleaf for more information. As this work is weather dependent, we will keep the community updated should these dates change.

Work will be undertaken with Sydney Water to modify a water connection on Marian Street. This may require a temporary loss of water to some properties. Sydney Water will directly notify any impacted properties closer to the date.

If you require any further information regarding the work program for Little Eveleigh or Marian Street, please call 1800 684 490 or email projects@transport.nsw.gov.au

Where will work take place?

Project and work areas include inside the rail corridor, at our site compounds at North Eveleigh and Marian Street, and on Little Eveleigh, Lawson, Wilson, and Marian Streets. The site access points are at Newtown, Macdonaldtown, Eveleigh, and Erskineville.

Upcoming changes to parking

Parking will be temporarily removed on surrounding streets for service searching and the delivery of plant and equipment to our site compounds.

- **Rosehill Street:** Up to five parking spaces will be temporarily unavailable **from Monday 1 August to Wednesday 31 August.**
- **Wilson Street:** Up to six parking spaces will be temporarily unavailable **from Wednesday 24 August to Wednesday 31 August.**

Please refer to the map overleaf for more information.

Work progress

Work on the Redfern Station Upgrade Project has been affected by the impacts of COVID on the workforce over the last 18 months, together with the extreme rain events that we have encountered.

We wanted to take this opportunity to thank you for your patience during this time and to provide an update on work progress.

We anticipate that the upgrade of the Marian Street shared zone will be completed in the coming weeks, and stage two of the Little Eveleigh Street shared zone should be completed in the coming months. Both shared zones are expected to be open for use in late 2022.

Major construction work on the new southern concourse and new entrances on Marian and Little Eveleigh Streets, are expected to be complete by mid-2023. However, we will keep the community updated as work progresses.

What you may notice

Equipment used during all of the activities outlined in this notification may include cranes, elevated

work platforms, access equipment, flatbed crane trucks, excavators, dump trucks, core hole drills, compactors, forklifts, concrete trucks and concrete pumps, watercarts, chainsaws, lighting towers, generators, tree stump grinders, mulchers, work vehicles and hand held power tools.

At times, our activities require the use of equipment that operates at a higher sound level than standard equipment.

These include power saws, grinders, jackhammers, rollers, rattle guns, vacuum trucks, rock hammers or breakers, and piling rigs. The use of this equipment can cause vibration and may be noticeable to nearby residents. We will minimise noise and vibration impacts by turning off equipment when not in use and where possible, use noise absorbing blankets.

A real time environmental management system is in place to ensure noise, vibration and dust levels are operating within our project requirements.

For more information on how we manage our noise and vibration impacts, please refer to the Construction Noise and Vibration Management Plan under the "Management Plans" section on the project webpage (transport.nsw.gov.au/redfern).

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. All activities being undertaken adhere to COVID safe practices and comply with current NSW Health COVID-19 Public Health Orders and restrictions.
