

Redfern Station Upgrade – New Southern Concourse

Special notification - mid week work

Transport for NSW | August 2022

Upcoming activities on the bridge

As part of the New Southern Concourse, installation of steel for the lift shaft entrance on Platforms 4 and 5 is required. For safety reasons, this work can only be undertaken between the first and last train, when trains aren't running. This work is also dependent on weather conditions on the day.

Due to this, the work will be undertaken between **10pm Wednesday 24 August and 5am Thursday 25 August**. If there are weather impacts, this work will occur between **10pm Thursday 25 August and 5am Friday 26 August** instead.

Wherever possible, noisy work is scheduled during daylight hours, and break periods are programmed to minimise impacts on the community. Our standard construction hours are 7am to 6pm Monday to Friday and 8am to 6pm Saturday.

For additional information regarding work outside of standard construction hours, please refer to the August notification on the project webpage at transport.nsw.gov.au/redfern.

Where will the work be undertaken?

The steel will be installed on the New Southern Concourse over Platforms 4 and 5.

Why are there activities planned outside of standard construction hours?

This work will take place at night to ensure the safety of workers and minimise impacts to the community. Sometimes out of hours work can be noisy. A noise assessment will be undertaken prior to the work, and more information will be provided to impacted residents closer to the date.

What you may notice

Equipment used during these work activities will include elevated work platforms, rattle guns, grinders, work vehicles and hand held power tools.

At times, our activities require the use of equipment that operates at a higher sound level than standard equipment. We will minimise noise and vibration impacts by turning off equipment when not in use, and where possible, use noise absorbing blankets. A real time environmental management system is in place to ensure noise, vibration and dust levels are operating within our project requirements.

For more information on how we manage our noise and vibration impacts, please refer to the Construction Noise and Vibration Management Plan under the “Management Plans” section on the project webpage transport.nsw.gov.au/redfern.
