

Revesby Commuter Car Park

Project Update | August and September 2022

Upcoming construction work

Construction on the Revesby commuter car park extension is progressing well, and work is expected to be completed late-2022. During August and September construction activities include:

- New concrete columns and slabs for the car park floor
- Structural strengthening works on the lower levels of the car park
- Electrical installation, including new lights and solar panels, and upgrades to the switch board
- Work to extend lift shafts and stairwells, including glass panel installation
- Installation of new signage, bike hoops and other street furniture
- Installation of the façade
- Construction of a new raised pedestrian crossing on Haydock Lane
- Removal of the tower crane, hoist, and site compound
- Wayfinding and statutory signage installation for all levels
- Cleaning and tidying works

The equipment used during the work will include concrete trucks, tower crane, vacuum trucks, surveying equipment and hand tools.

Lift closures

Lifts 5 and 6 will remain closed until **Friday 30 September 2022** to allow for the extension of the lifts to progress. The car park stairs will remain open during this work. Please use stairs to access the upper levels of the car park while the lifts are unavailable. If you are travelling with a pram, please use the car park on Marco Avenue while the lift is closed.

Changes to accessible parking spaces

Accessible parking spaces will remain at the Revesby Station car park located on Marco Avenue until **Friday 30 September 2022**. Signage is in place to notify commuters of these changes.

We will endeavour to make parking spaces available as early as possible throughout the construction program and will notify customers of additional parking availability. Please plan your journey ahead of time as it may take longer than usual to find a parking space. If possible, please consider alternative transport options to and from the station or flexible working arrangements during this time.

Switch Board upgrade work

From **Monday 29 August to Saturday 3 September**, generators on the ground floor of the car park will provide power to the car park. This is to allow for the switch board to be upgraded without impacting customers accessing the car park.

Our work schedules

We will be on site from **Monday to Friday between 7am and 6pm** and between **8am and 1pm on Saturdays**. We will contact you to advise of any work required outside these hours. Deliveries will be scheduled outside of peak times wherever possible to minimise disruption to pedestrians and motorists.

Haydock Lane Entry Closure

From **Monday 15 August to Saturday 20 August**, entry to Haydock Lane via Simmons Street will be unavailable as we construct a raised pedestrian crossing.

Access for businesses will be via The River Road.
