

Transport Access Program

St Peters Station Upgrade

Construction update | December 2022 and January 2023

The St Peters Station Upgrade is part of the Transport Access Program, a NSW Government initiative to provide a station that is accessible to people with disability, limited mobility, parents and carers with prams, and customers with luggage.

Out of hours work in December and January

Some activities are required to be undertaken outside of our standard work hours. These activities have been planned during scheduled Sydney Trains trackwork weekends.

At this stage, we are planning to work:

- From 5am Saturday 14 until 10pm Sunday 15 January
- From 5am Saturday 21 until 10pm Sunday 22 January.

Activities include but are not limited to:

- transformer (located next to the rail access gate on Lord Street) upgrade work
- installing the lift fit out equipment on all platforms
- installing new handrails on all platforms
- installing canopies on Platform 3/4
- accessing the rail corridor via the rail access gates on Lord, Concord, and Council streets.

Schedules are subject to change due to permits, weather, and site conditions. **Please register for email updates** so that we can keep you updated about our work. Refer to the contact details on the next page.

Work during standard construction hours

Day work is continuing **Monday to Friday from 7am until 6pm**, and **on Saturdays from 8am until 1pm**. This work includes but is not limited to:

- installing new steel for the canopies on Platforms 3 and 4
- upgrading the Station Manager's office
- installing roof, glazing and electronics to the new lifts
- modifying the existing station toilet to become one family accessible toilet
- footpath upgrading and landscaping on May Lane and Lord Street
- installing handrails and balustrades around the station.

Holiday shutdown period

The site will be closed from 6pm Wednesday 21 December 2022 with work resuming on Monday 9 January 2023. Thank you for your patience over the past year as we have worked to carry out the upgrade of St Peters Station.

What to expect

- **Intermittent periods of noisy work:** equipment used will include generators, trucks, gurney, circular saw, jack hammers, crane, compactor, excavators, and various hand and power tools. Measures to reduce noise will be implemented including turning equipment off when not in use, positioning equipment as far away from properties as possible, using non-tonal reversing beepers, and stopping work for respite periods.
- **Temporary parking restrictions:** at times, up to eight car spaces at the Lord Street access gate will be required to facilitate vehicle access. Additional temporary parking removal may be required either side of the station entrance on Lord Street. Potential impacts are shown on the map below. Signage will be installed in advance of the required parking removal.
- **Intermittent temporary footbridge closures:** access to the station from Lord Street and May Lane will be restricted at times. Access via Goodsell Street will remain open and Lord Street users can access the station via King Street / Princes Highway.
- **Increase in construction traffic:** vehicles will access the rail corridor via the rail access gates on Goodsell, Council, Concord, and Lord streets.
- **Intermittent temporary footpath closures on May Lane:** to allow for footpath upgrades and landscaping work. Signage will be in place and an alternative walking route is available via Goodsell Street.
