

Community Update | August 2022

Transport Access Program St Peters Station Upgrade

The St Peters Station Upgrade is part of the Transport Access Program, a NSW Government initiative to provide a station that is accessible to people with disability, limited mobility, parents and carers with prams, and customers with luggage.

Out of hours work in August

We will be working **continuously from 6am Saturday 13 August until 10pm Sunday 14 August.**

These activities have been scheduled to take place during a Sydney Trains trackwork period when no trains are running, minimising disruption and maintaining the safety of our construction team and customers.

Over this weekend we will be installing:

- the roofing on top of the lift shaft and canopy on Platforms 1 and 2
- the lift fit out equipment on all platforms
- new screens and guardrails to the station footbridge
- new handrails on all Platforms.

We will be accessing the rail corridor via the rail access gate on Lord Street and Concord Street.

Work schedules are subject to change due to permits, weather and site conditions.

What else we are doing in August

Day works are continuing **Monday to Friday from 7am until 6pm, and on Saturdays from 8am until 1pm.** We will be:

- installing new steel for the canopies on Platforms 3 and 4
- upgrading the Station Manager's office
- installing electrical equipment in and around the concourse area
- installing roof, glazing and electronics to the new lifts
- modifying the existing station toilets to become one family accessible toilet
- landscaping and upgrading the footpaths on Lord Street, Railway Lane and May Lane adjacent to the station
- installing handrails and balustrades around the station.

What to expect

Intermittent periods of high noise - equipment used will include generators, trucks, gurney, circular saw, jack hammers, crane, compactor, excavator, and various hand and power tools. Measures to reduce noise will be implemented, including turning equipment off when not in use, positioning equipment as far away from residences as possible, using non-tonal reversing beepers, and stopping work for respite periods.

Temporary parking restrictions - up to **eight car parking spaces around the Lord Street access gate** will be required to facilitate vehicle access. Up to three parking spaces either side of the Lord Street footbridge entrance will also be unavailable while landscaping work is carried out. Signage has been installed with dates of the parking restrictions.

Intermittent footbridge closures - access to the station from Lord Street and May Lane will be restricted at times. Access via Goodsell Street will remain open, Lord Street users can access the station via King Street / Princes Highway on dedicated pedestrian paths.

Increase in construction traffic - vehicles will access the rail corridor via Goodsell Street, Council Street, Concord Street and Lord Street rail access gates.

Intermittent pedestrian detours on May Lane – to allow for the delivery of landscaping materials to Railway Lane. Signage will be in place, please follow the alternative walking route via Goodsell Street during this time.

Thank you very much for your patience while we complete this important work.
