

# Transport Access Program

## St Peters Station Upgrade

Construction update | October 2022

The St Peters Station Upgrade is part of the Transport Access Program, a NSW Government initiative to provide a station that is accessible to people with disability, limited mobility, parents and carers with prams, and customers with luggage.

### Out of hours work

In October, some activities will be required outside of our standard work hours. There will be continuous work happening during the following periods:

- from **6am Saturday 8 October until 10pm Sunday 9 October**
- from **10pm Saturday 29 October until 12am Friday 4 November**.

Activities will include:

- resurfacing and regrading on all platforms
- installing the lift fit out equipment on all platforms
- installing new handrails on all platforms
- electrical upgrades and connections
- accessing the rail corridor via the rail access gates on Lord and Concord streets.

Schedules are subject to change due to permits, weather, and site conditions. **Please register for email updates** so that we can keep you updated about our work. Refer to the contact details on the next page.

### Other work in October

Day work is continuing **Monday to Friday from 7am until 6pm**, and **on Saturdays from 8am until 1pm**. This work includes but is not limited to:

- installing new steel for the canopies on Platforms 3 and 4
- upgrading the Station Manager's office
- installing roof, glazing and electronics to the new lifts
- modifying the existing station toilet to become one family accessible toilet
- landscaping and upgrading the footpaths on Lord Street and Railway Lane
- installing handrails and balustrades around the station.

### What to expect

- **Intermittent periods of high noise:** equipment used will include generators, trucks, gurney, circular saw, jack hammers, crane, compactor, excavators, and various hand and power tools. Measures to reduce noise will be implemented including turning equipment off when not in use, positioning equipment as far away from properties as possible, using non-tonal reversing beepers, and stopping work for respite periods.

- **Temporary parking restrictions:** at times, up to eight car spaces at the Lord Street access gate will be required to facilitate vehicle access. Additional temporary parking removal may be required either side of the station entrance on Lord Street. Potential impacts shown on the map on the next page. Signage will be installed in advance of the required parking removal.
- **Intermittent temporary footbridge closures:** access to the station from Lord Street and May Lane will be restricted at times. Access via Goodsell Street will remain open and Lord Street users can access the station via King Street / Princes Highway.
- **Increase in construction traffic:** vehicles will access the rail corridor via the rail access gates on Goodsell, Council, Concord, and Lord streets.
- **Intermittent temporary pedestrian detours on May Lane:** to allow for the delivery of landscaping materials to Railway Lane. Signage is in place and an alternative walking route is available via Goodsell Street.
