

Wollstonecraft Station Upgrade

May 2022 – Project completion

Wollstonecraft Station Upgrade is now complete, and the community can use the station's new and improved accessibility features, including:

- two new lifts connecting the station platforms
- new station entry ramps from Shirley Road and Telopea Street to provide accessible paths to the lifts
- platform raising work to bring platforms level with train carriages
- a covered boarding assistance zone on Platform 1
- a new accessible parking space on Shirley Road
- improved amenities such as a new male and female ambulant toilet and a new family accessible toilet
- improved CCTV and lighting.

Thank you for your patience and cooperation throughout the construction of the Wollstonecraft Station Upgrade.

The project was completed as part of the Transport Access Program, a NSW Government initiative to provide better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure.

Finishing work in May/June

While all major work at the station is now complete, minor finishing work will continue throughout May and early June, including the isolation of the low voltage power supply around the station.

Out of hours work

Finishing work to isolate the low voltage power supply can only occur after the current power supply is turned off. The power supply can only be turned off between 1am and 4am, after the last train has left the station, and the first train has visited the station in the morning.

To make best use of this time, we will schedule our works from **8pm Thursday 26 May to 4am Friday 27 May**. During this time, we will reinstall the temporary conduits for the eastern walkway light near the tunnel on Platform 1. This will require minor hand digging, pipe laying and the re-feeding of cables into the new conduits.

To mitigate any noise impacts, all pre-digging and preparation work will be completed during our standard working hours. Minor digging and backfilling will be completed with non-powered hand tools such as shovels and will occur on the walkway side near the Platform 1 underpass tunnel.

We appreciate your patience as we undertake these important finishing works and apologise for any inconvenience caused.

New lift, landscaping and ramp facilities on Platform 2 at Wollstonecraft Station

New lift, landscaping and ramp facilities on Platform 2 at Wollstonecraft Station

Key facts

320 workers used on the project

20000 hours worked

60 tonnes of structural steel used

400 cubic metres of concrete poured

New footbridge, landscaping and ramp facilities at Wollstonecraft Station
