Coffs Harbour Community Update

Project update | August 2021

Artist's impression of the completed boat ramp and surrounds

Transport for NSW Maritime is beginning construction on the upgrade to the Coffs Harbour Regional Boat Ramp to increase the size of the ramp, provide better facilities and increase parking options.

What are we doing?

The \$14m project will be built in two stages and will be completed in 2022. The table below indicates the construction scheduled for each stage.

Stage 1: August 2021 – April 2022

Extending the existing breakwater by 75m

Widening the existing boat ramp, adding an additional two lanes

New top surface over the existing boat ramp area

Extending the existing pontoon

Adding two new pontoons

Dredging the existing boat ramp basin and channel as part of an ongoing dredging program at this site

Stage 2 January – September 2022

Extending the existing main carpark to include additional parking for cars, boats and trailers

New carpark entrance at the western end of the carpark

Blocking the entry adjacent to the boat ramp off Jordan Esplanade (for safety reasons)

Diverting traffic along Jordan Esplanade Road opposite the main carpark

New road signage

New rigging and de-rigging bays around the main carpark

A new shared pathway (3 m wide) for walking/cycling

New amenities facility

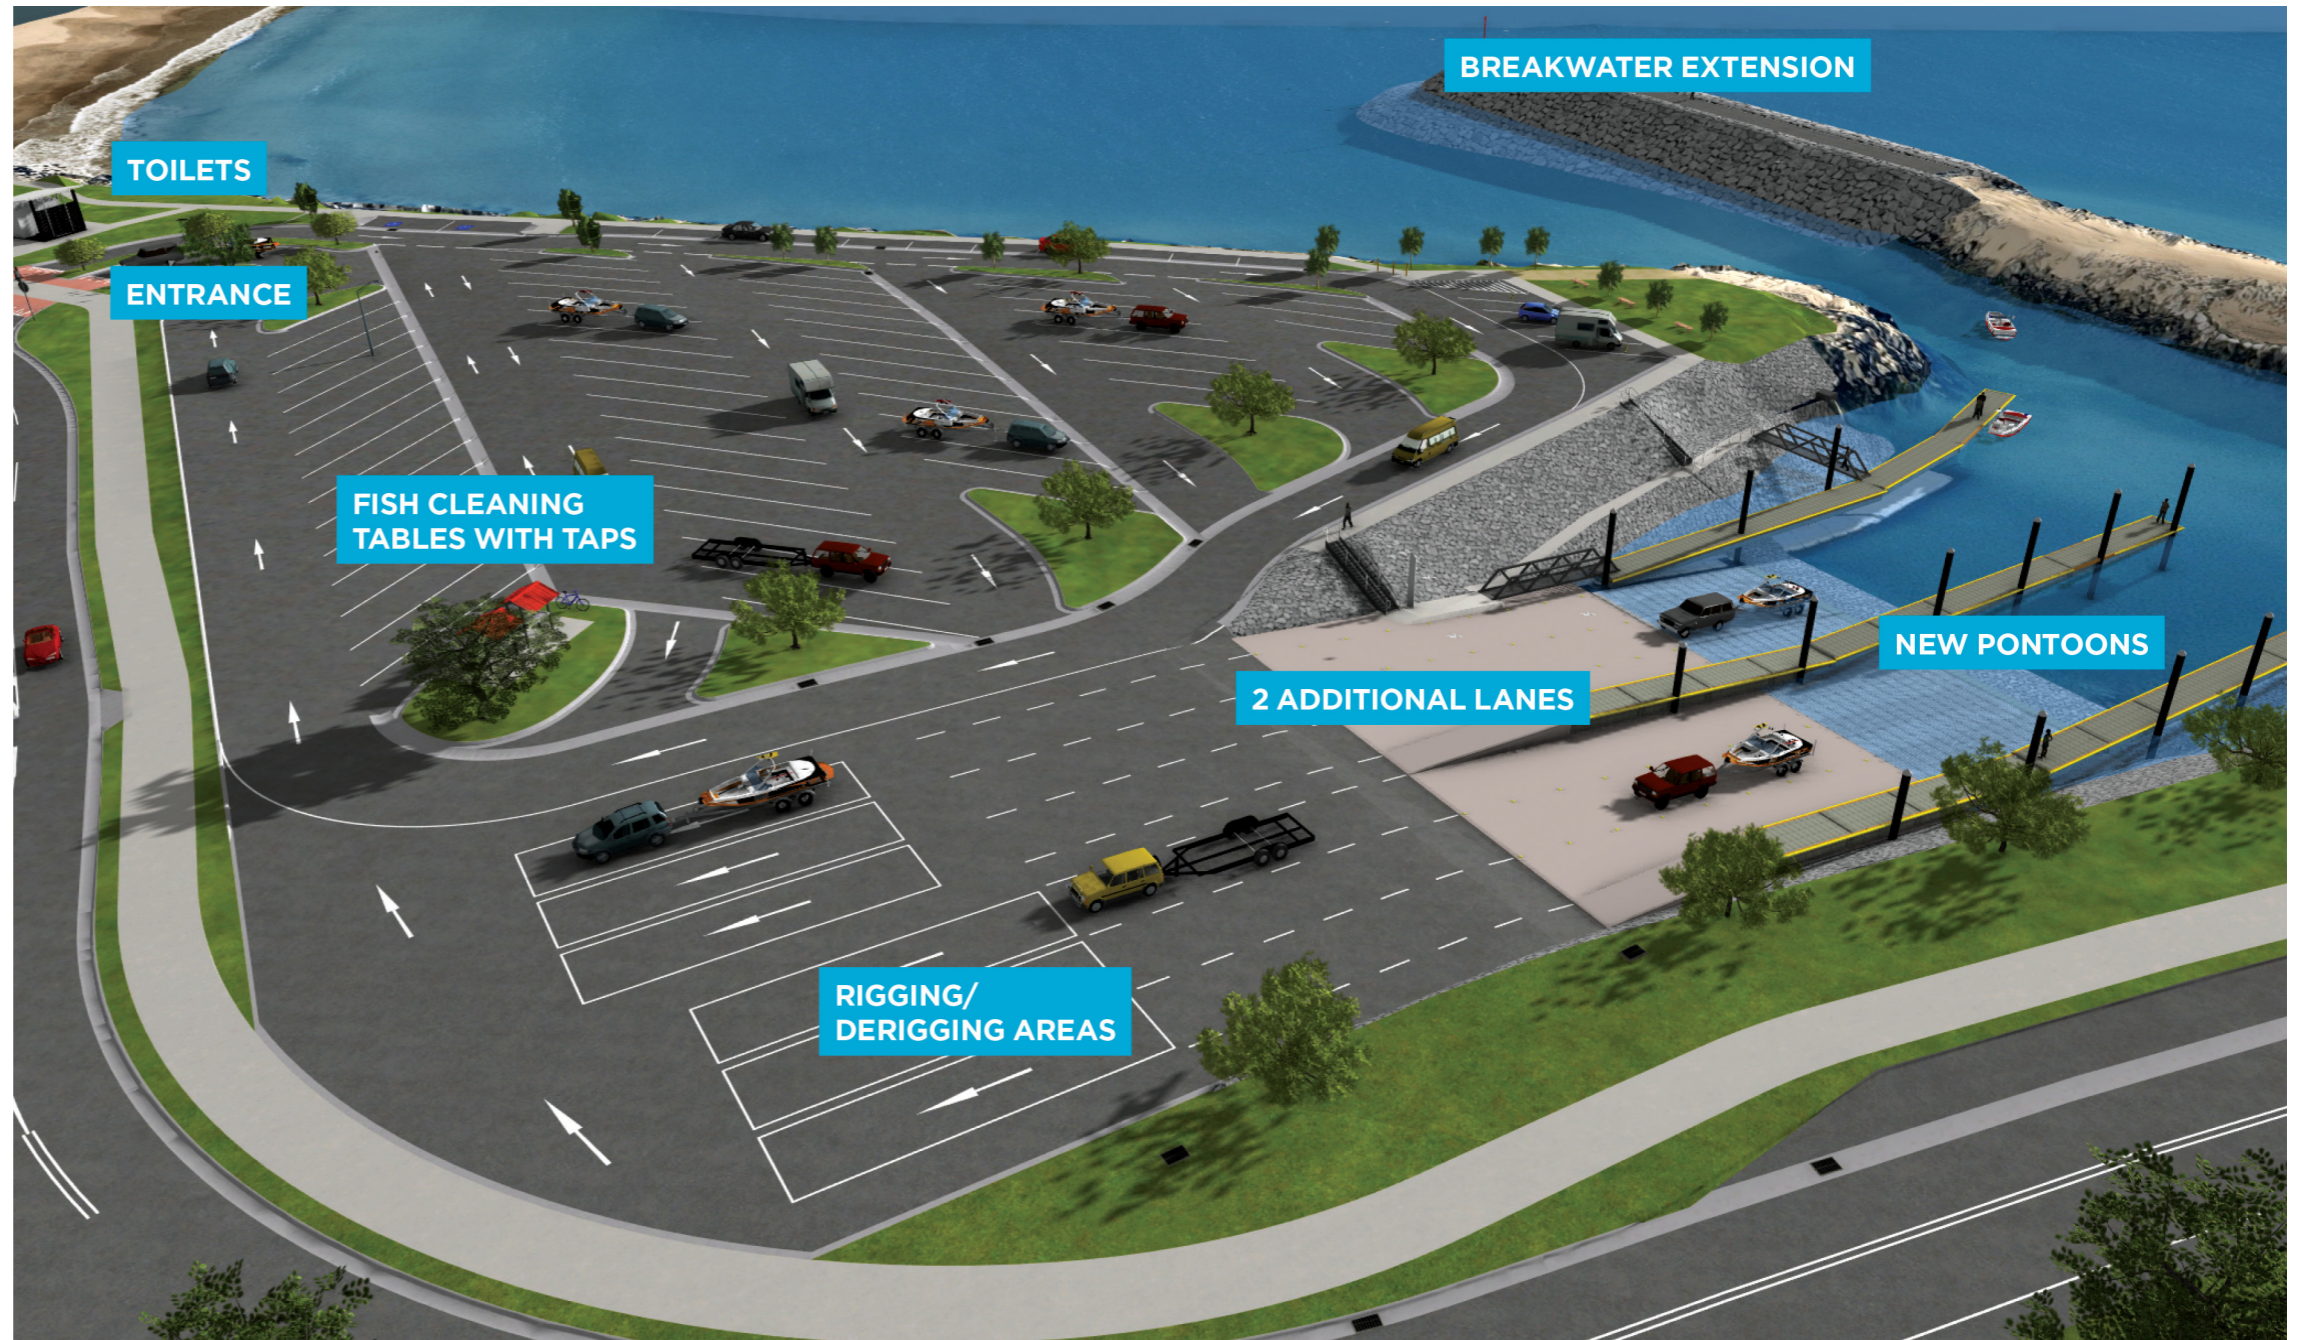

New lighting and signage

Recreational furniture including seating and tables

Pedestrian pathway on south side of Jordan Esplanade for access to amenities facility in the main carpark area

Landscaping

Extending services, including water, power, stormwater and sewerage

Artist's impression of the fish cleaning tables

Artist's impression of the carpark entrance

How will this affect me?

- At least two lanes of the boat ramp will remain open during most of the construction work, with short periods with no access. We will notify the community before the closures to allow time to make alternative arrangements.
- There may be some restricted parking and delayed access to a boat ramp lane due to some road lanes being closed off for work.
- Work on the pontoons, boat ramp and dredging may temporarily restrict movements in the bay. Boat users and visitors will need to take extra care in manoeuvring their vessels in and out of the harbour.
- Stage 1 is expected to affect road traffic in the area. There will be truck movements delivering equipment, materials and rock for the breakwater, as well as taking away debris. Traffic control measures will be in place during this work to maintain safety and control.
- The carpark will close during stage 2 construction work. Road traffic control measures will be in place to maintain safety and manage access to and from the boat ramp.

Frequently asked questions

Q: Has the community had input into the design of this project?

A: Yes. Last year the community commented on the Review of Environmental Factors (REF) and the proposed design. Where possible, community feedback has been incorporated into the final design. Some of the changes made from community feedback were:

- Car parking spaces are now all drive-through (as requested) with very minimal loss of parking spaces for car/trailer combinations.
- Landscaping has been revised and is now included on north and south side of Jordan Esplanade, on north/south end of each parking bays, around the fish cleaning area and around the entrance to the carpark.
- The provision of six de-rigging bays (drive through) to align with boat ramp lanes.
- The amenities block has been moved to the west side of carpark.
- We have provided for a separate outdoor shower on the west side of carpark.
- Proposed picnic tables and seating.
- The pedestrian path has moved to west of amenities block.

Q: Will there be easier parking?

A: Yes. As a result of community feedback, we have designed all the parking spaces to be drive-through, and allow for turning circles and bends for easy manoeuvring.

Q: Will there be toilets at the boat ramp?

A: Yes, an amenities block is part of the upgrade.

Q: Will there be boat rigging/derigging areas at the ramp?

A: Yes, see the final plans in this document.

Q: Will the fish cleaning facilities be upgraded?

A: Yes, the project will upgrade and move the fish cleaning tables. They will also have running water.
