

Transport for NSW

Investigation work continuing

Monday 16 May 2022

Sutherland to Cronulla Active Transport Link (SCATL)

Transport for NSW is continuing the geotechnical and utilities investigations for SCATL on the Kingsway between Wandella Road and Kiara Road.

Due to recent weather conditions, work is continuing from earlier this year.

These investigations will involve: electronically locating and surveying utilities, drilling for soil samples, non-destructive drilling to locate utilities as well as reinstating any disturbed areas. Some potholing will take place, which may be noisy due to saw cutting and jackhammering. Our team will aim to finish noisier work by 11pm.

We anticipate this work will take place over **three night shifts** between **8pm and 5am** from **Monday 16 May to Monday 23 May**, weather permitting.

If you have any further questions, please contact the project team:
