

Transport for NSW

Investigation work continuing

Monday 9 May 2022

Sutherland to Cronulla Active Transport Link (SCATL)

Transport for NSW is continuing the geotechnical and utilities investigations for SCATL on Kingsway between Banksia Road and Kareena Road.

Due to recent weather conditions, this work is continuing on from earlier this year.

This investigation work will involve: electronically locating and surveying utilities, drilling for soil samples, non-destructive drilling to locate utilities as well as reinstating any disturbed areas.

We anticipate work will take place over **seven night shifts** between **8pm** and **5am** from **Monday 9 May** to **Monday 30 May**, weather permitting.

If you have any further questions, please contact the project team:
