

Commuter Car Park Program | February 2022

Edmondson Park

The new Edmondson Park South multi-storey commuter car park is now open

The newly completed Edmondson Park South Commuter Car Park provides over 1,250 additional parking spaces for transport customers, with planning underway for a second car park to provide up to 700 additional spaces north of the station.

This project is being delivered as part of the NSW Government's Commuter Car Park Program, providing more convenient access to public transport at key interchanges and helping to ease congestion on our roads.

The new southern car park is built with sustainable features, including 10 electric vehicle charging stations and capacity for more to be added in the future.

The rooftop has over 1500 solar panels and helps the car park meet net zero energy requirements.

Lifts, wayfinding signage, CCTV and LED lighting with motion detection and daylight sensors increase accessibility, safety, security and sustainability at the commuter car park.

Over 40 accessible parking spaces have been included in the new multi-storey car park, including an accessible electric vehicle charging space. The surrounding pedestrian pathways have been upgraded. The new car park will be fitted with Transport Park&Ride Infrastructure.

Key facts

900 workers on the project

130,000 approx. hours worked

50 tonnes of structural steel and **700** tonnes of reinforcing steel used

11,500 cubic metres of concrete poured

Built with the environment in mind

The southern new car park is designed and built to reduce embodied carbon emissions and adapt to climate change. The features include:

- building the car park with an average 37% recycled concrete mix material and reinforced steel with an estimated 65% to 80% of recycled scrap
- over 1,500 rooftop solar panels that provides power for the building and sun protection for commuters and parked cars
- a rainwater capture system which helps reduce localised flooding, filters impurities from runoff and assists in watering the new landscaping
- 10 electric vehicle charging stations and capacity for more to be added in the future.

The rooftop has over 1500 solar panels to help power the car park

Ghost Trees and The Lost Woodland

Dharug man, Shane Smithers has created an original artwork that adorns the exterior of the new southern car park, visually grounding the building. The artwork tells the story of the Cumberland Woodland that used to spread across what is now Western Sydney.

Generations of clearing, grazing, farming and the urban sprawl took its toll on the woodland. The western façade of the building acknowledges the loss of Cumberland Woodland incorporating a kind of modern pixelated powder-coated steel expression of a lost woodland. The eastern face looks toward urban development. This context invites the telling of a different story, not of the destruction of the woodland, but of its urban regeneration.

Ghost Trees, Shane Smithers, 2021

Great Cumberland woodland trees stand against a background of stylized houses, rooflines and structures that replace the once open plains and wooded areas. The eastern face completes the narrative in a way that acknowledges the destruction of the woodland but looks forward to a better future where the built environment with all of its exotic colours and shapes includes an indigenous canopy. This story is about regeneration, old and new coming together and a better future for us all.

Transport for NSW and the artist acknowledge the traditional Aboriginal owners and custodians of the land on which *Ghost Trees and The Lost Woodland* is situated, and pay our respects to Elders past and present. We welcome all who visit this place.

Thank you for your patience and understanding while we completed this important project.

Finishing Works

The temporary car park located north of Edmondson Park Station will be closed from Sunday 27 February. In the coming months, you may notice some upgrades to the existing pedestrian crossing on Henderson Rd.

Edmondson Park North Commuter Car Park

Transport for NSW is taking the next step in delivering additional parking spaces at Edmondson Park Station precinct.

Planning is underway for a second multi-storey commuter car park, just north of Edmondson Park Station on Soldiers Parade, which will provide up to 700 additional spaces.

Key features of the proposal include:

- up to 700 additional commuter car spaces
- electric vehicle charging spaces and motorbike parking
- Transport Park&Ride infrastructure (Opal operated boom gates)
- CCTV, lighting and wayfinding for improved safety and security
- lift access
- road pavement and pedestrian pathway upgrades for safe and convenient access to and from the station
- solar panels on the rooftop which will be used to help power the car park
- a storm water capture and reuse system.

Next steps

Transport for NSW is seeking feedback on the design for the Edmondson Park North Commuter Car Park. Feedback is open until **Sunday 13 March**.

Your input will help inform the planning approvals process and will be considered during the detailed design phase of the project. Transport for NSW will continue to work with key stakeholders and more information will be shared with the community soon.

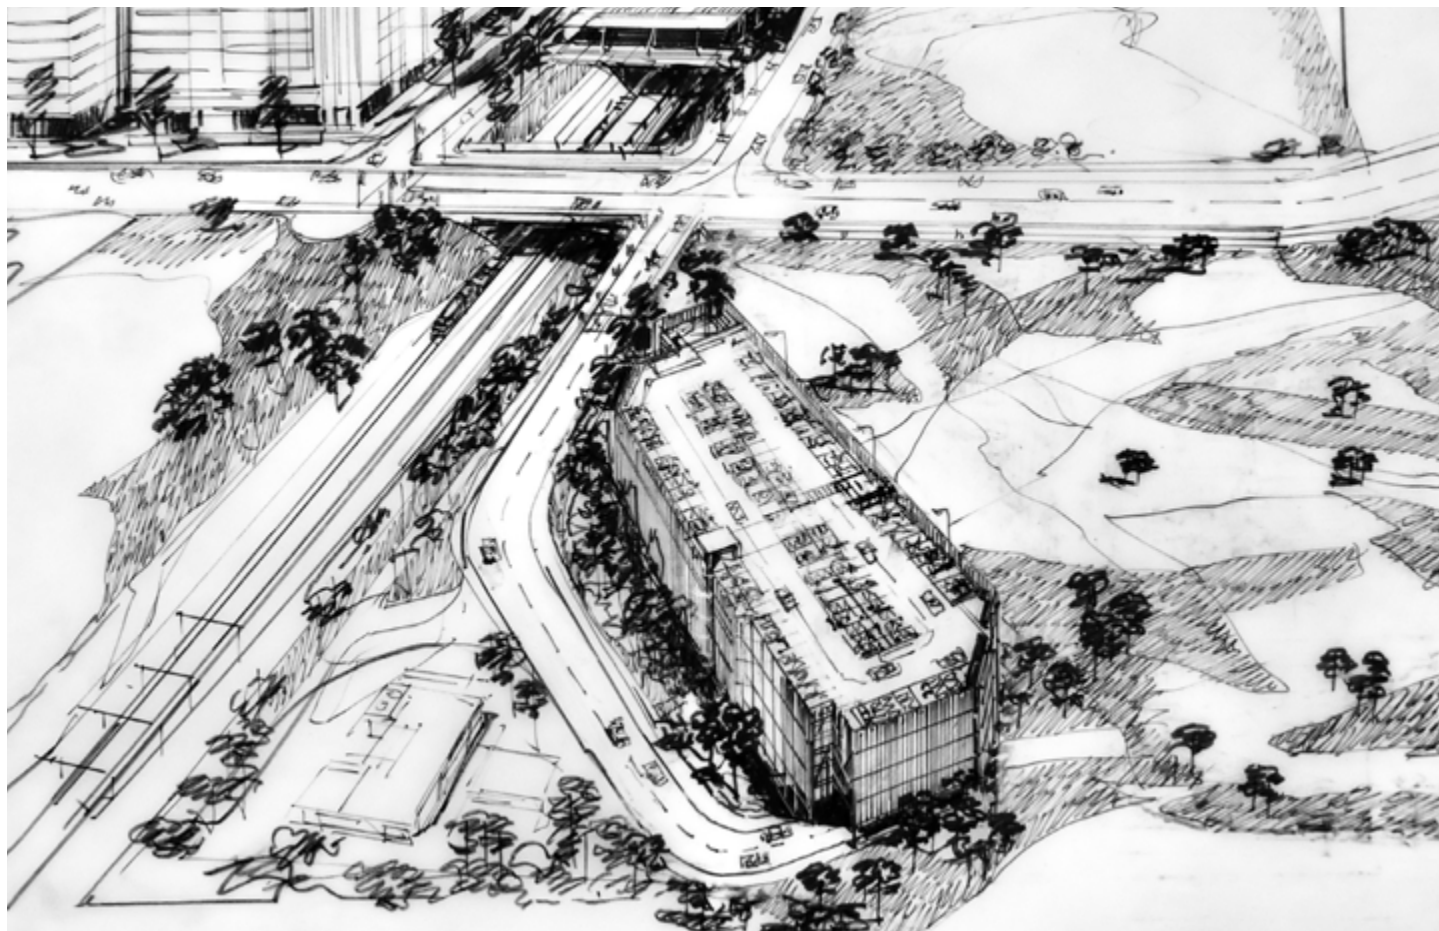

Provide your feedback by Sunday 13 March

Information about the new northern car park is available at: www.transport.nsw.gov.au/edmondsonpark.

If you have any questions or feedback, please complete our online feedback form, call 1800 684 490 or email projects@transport.nsw.gov.au.

Commuter Car Park Program

The Commuter Car Park Program is a NSW Government initiative to provide you with more convenient access to public transport at key transport interchanges, and to help ease congestion on our roads.

We have already delivered more than 12,000 commuter car spaces across Sydney since 2011, with around 6,000 additional spaces on the way.

Keeping you up to date

We will continue to keep you informed about the project through notifications to customers, local residents and businesses. Frequent updates are published at www.transport.nsw.gov.au/edmondsonpark.

If you would like to be added to the project distribution list, please email projects@transport.nsw.gov.au and we will email you updates as the project progresses.
