

Schofields Commuter Car Park

March 2022

Project Update

Transport for NSW is delivering approximately 700 additional commuter parking spaces at Schofields to provide the community with more convenient access to public transport and reduce congestion on our roads. The car park is expected to be open to commuters in mid-2022.

Upcoming work

From 1 March 2022 to 31 March 2022 work at the Schofields Commuter Car Park work site will involve:

- delivering and removing materials using plant and equipment
- adjusting site fencing and amenities
- installing services within the car park
- levelling the site
- asphalt surfacing
- kerb, gutter and footpath construction activities
- line marking, CCTV, lighting and wayfinding installation activities
- retaining wall construction activities
- landscape gardening activities.

During March work will also continue in work areas outside of the Schofields Commuter Car Park work site, including:

- upgrading car park spaces in the Bridge Street car park at Schofields Station; and
- relocating the pedestrian crossing across Schofields Road, between Railway Terrace and Veron Road.

These works are in line with the current Public Health Orders and a COVID-Safe plan is in place, including the use of face masks and QR codes.

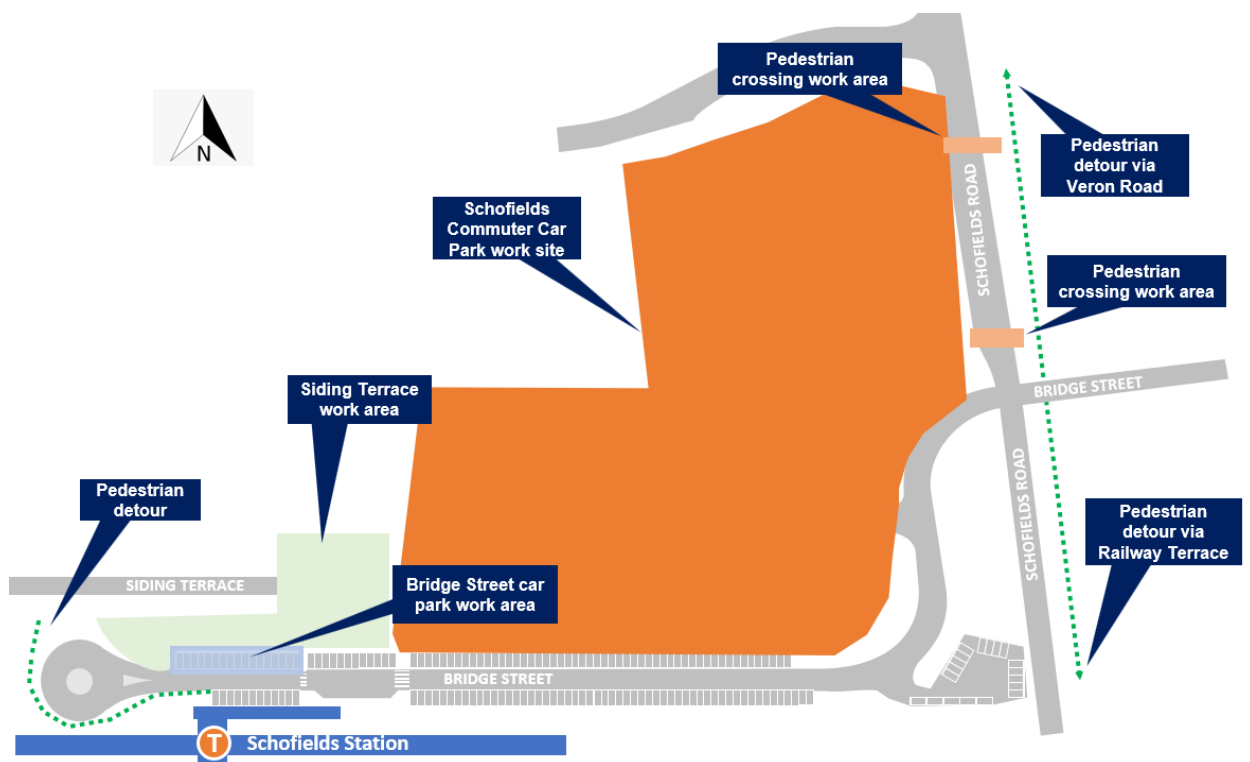

Our work schedule

Our work hours will be between **7am to 6pm Monday to Sunday**, weather and site conditions permitting. If any additional work is required outside of these hours, the community will be notified in advance

How will the work affect you?

Our work may be noisy at times. We will make every effort to lessen the disturbance where possible including adding shade cloth mesh to fencing, using noise blankets, turning off vehicles and equipment when not in use and using non-tonal reversing beepers. TfNSW is committed to minimising the effects of construction on the community. We will monitor work activities and put measures in place to lessen the disturbance during the work. You may notice an increase in the number of construction vehicles and dust. We will be monitoring these activities and where possible, put dust control measures in place. Pedestrian detours, signage and traffic control may be in place. For your safety, please follow the direction of traffic control.
