

# St Marys Station and precinct

Project update

February 2022

*Construction progress on the multi-storey commuter car park at St Marys*

## Projects overview

Transport for NSW is delivering improvements across the state to create vibrant, productive, liveable and sustainable places that support community health, safety and wellbeing. To promote future employment growth, support the local population now and into the future, and to improve connections across Greater Western Sydney, St Marys Station and precinct is being renewed. Transport for NSW projects currently being undertaken in the area include:

- St Marys Commuter Car Park extension
- Sydney Metro – Western Sydney Airport Enabling Work

For more information about these projects, please visit our project webpage

[www.transport.nsw.gov.au/stmarys](http://www.transport.nsw.gov.au/stmarys)

# Upcoming construction work

## St Marys Commuter Car Park extension

We will be undertaking the following construction activities in February 2022:

- Fit out and painting works throughout the car park
- Continuing with exterior structural steel installation
- Continuing work to reconfigure the layout of the ground floor which requires some parking spaces to be unavailable
- Finishing works in preparation for existing lift reopening.

More parking spaces will become available on Level 3 in early 2022.

## Sydney Metro – Western Sydney Airport Enabling Work

Transport for NSW is continuing enabling work at St Marys Station to prepare the site for construction of Sydney Metro.

In February, this work involves:

- removal of overhead wiring and supporting structures north of the rail corridor
- survey and investigation activities at the southern entrance to the Station in preparation for the relocation of the lift and stairs later this year
- ongoing upgrade work for the new corridor access track off Glossop Street, including installation of concrete barriers.

Please see our work areas highlighted on the map above.

Signage, fencing, temporary pedestrian detours and traffic control will be in place as required to assist pedestrians, motorists, and cyclists around our work areas.

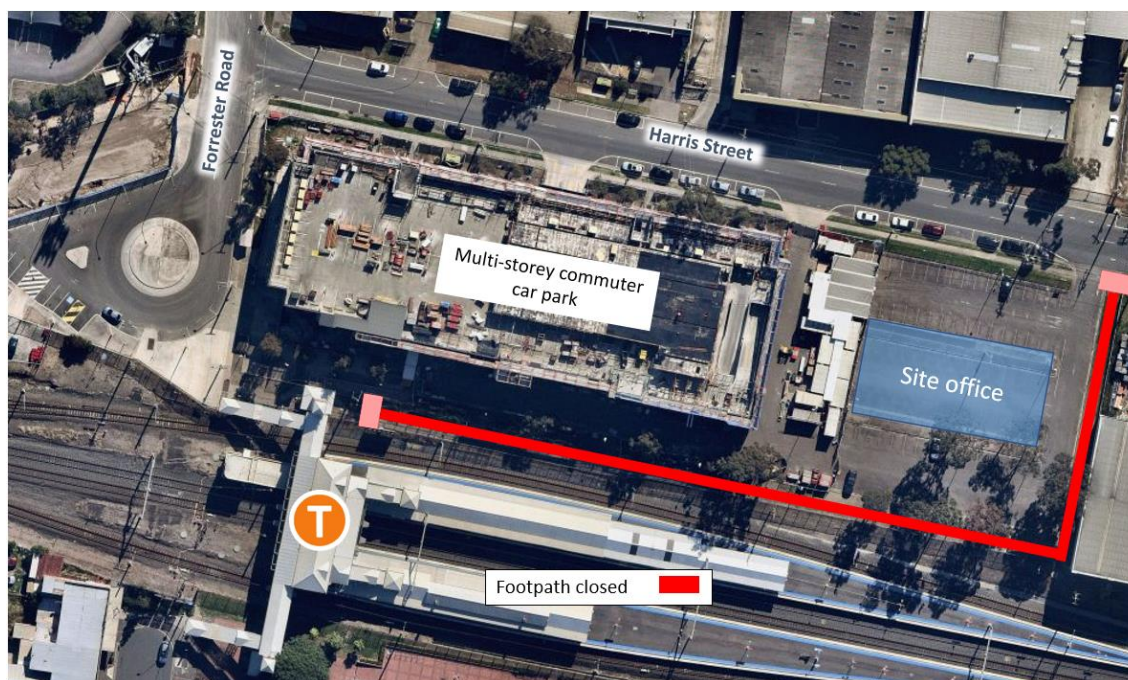

We schedule the majority of our night work to coincide with Sydney Trains' track work periods, where no passenger services are running, to help ensure the safety of our construction team and customers.

**Our work areas will be particularly busy Saturday 12 and Sunday 13 February as this is a Sydney Trains track work period. Please see specific work details overleaf.**

## Pedestrian access changes to the multi-storey commuter car park and Forrester Road

To safely enable the removal of overhead wiring and supporting structures, access at the southern side of the multi-storey commuter car park along the rail line will be closed. This closure will be in place from **6pm Friday 11 until 6pm Sunday 13 February**. Access to the multi-storey commuter car park will be maintained via the entrances on Harris Street. Please see map below. Signage and traffic control will be on site to assist pedestrians with temporary detours around the multi-storey commuter car park, and with any temporary changes to traffic movement on Forrester Road.

## Impacts to Harris Street at-grade commuter car parking spaces

From Friday 11 until Monday 14 February, we will be required to reserve **approximately 40 spaces in the southern area of the Harris Street at-grade commuter car park** to enable the safe operation of a crane. Traffic control will be in place to assist motorists with these changes.

## Traffic impacts on Glossop Street

To facilitate safe access of heavy vehicles into our construction site off Glossop Street, we will be required to temporarily close the left, northbound lane. The other northbound lane will remain open and traffic control will be in place to assist motorists with these changes. Please anticipate some delays when travelling through the area and plan your journey accordingly.

## Temporary restrictions to lift access at the station, adjacent to the multi-storey commuter car park off Harris Street

To enable the safe removal of overhead wiring, we will be required to **restrict access to the lift and stairs at the northern side of St Marys Station** (adjacent to the multi-storey commuter car park) for a period of **up to 30 minutes on approximately two occasions**. Traffic control will be in place to assist commuters. If you have any concerns about these impacts and would like to talk to a project representative about this work, please call the **Project Infoline on 1800 684 490**.

## Repurposing removed vegetation for the giraffes and koalas of Sydney Zoo

In early January we completed some tree clearing and vegetation removal south-east of the station off Glossop Street. Our Environment team have been working with Sydney Zoo to see if the species identified for removal would be of use for their animals and enclosures. The staff at Sydney Zoo were ecstatic to receive the removed vegetation and repurposed the foliage as one week worth of food for the giraffes and used the trucks and branches to improve the koala habitats. Sydney Zoo normally source the majority of vegetation themselves, often going out three times per week to collect food for the animals.

Thank you to our contacts Tara, Darryn and Frankie for working with us to repurpose removed vegetation. We hope to work with Sydney Zoo and their incredible team again in the near future.

Tree clearing and vegetation removal for donation to Sydney Zoo – January 2022

## Construction hours

The NSW Government has introduced new rules to support industry and continue the delivery of critical infrastructure during COVID-19.

In accordance with the *Environmental Planning and Assessment (COVID-19 Development – Infrastructure Construction Work Days No.2) Order 2020*, standard construction hours are **7am to 6pm Monday to Sunday, including public holidays**.

Work that is deemed non-intrusive may be completed outside of standard hours and without additional notification. We will notify you in advance of any additional day or night work that may impact you.

## Minimising community impacts

We understand that construction activities may cause disruption to the community and every effort will be made to minimise impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- installing noise barriers to shield residents from high impact noise activities
- conducting onsite monitoring to ensure compliance with strict environmental conditions relating to noise vibration and dust management.

## Keeping you up to date

We will continue to keep the community informed with regular project updates. More information about the project is available on our website [www.transport.nsw.gov.au/stmarys](http://www.transport.nsw.gov.au/stmarys)

If you would like to subscribe to our project distribution list, please contact us on **1800 684 490** or email [projects@transport.nsw.gov.au](mailto:projects@transport.nsw.gov.au). We send project updates via email monthly. For all urgent enquiries or complaints regarding construction activities, please call our **24-hour Construction Response Line** on **1800 775 465**.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **1800 684 490**. The interpreter will then assist you with translation.
