

More Trains, More Services

Arncliffe Station Canopy Extension

Transport for NSW | May 2022

What have we been doing?

Transport for NSW has been extending the platform canopy at Arncliffe Station. The extended canopy provides increased weather protection, encouraging customers to use the length of the platform and reducing crowding at busy times.

The canopy work is now complete and we will complete finishing works on the station platform this month.

What's planned next?

In May the site compound will be reopened in preparation for the resurfacing asphalt work to be completed at the southern end of the platform.

This work will take place **from 6am Saturday 21 May through to 10pm Sunday 22 May** during a scheduled Sydney Trains trackwork period when no trains will be running.

Scheduling construction work outside of standard construction hours enables our project team to complete essential activities safely.

Tools and equipment to be used include mobile work platforms, hand tools, asphalt machinery.

All work is dependent on weather and site conditions and is subject to change.

Thank you for your understanding and patience while we complete this important work.

How do we consider the community?

The project team understands construction activities may cause some disruption for the community and we will seek to minimise impacts as much as possible.

When carrying out our work, the project team utilises a noise assessment of the programmed activities to determine the noise to be generated

and the appropriate mitigation measures to be put in place. We will also continue to ensure we adhere to strict environmental conditions relating to vibration and dust management.

Will the commuter car park be affected?

The commuter carpark will be closed **from 5 pm Friday 20 May until 12 am Monday 23 May** to allow for plant and equipment to access the work site. Signage will be erected for pedestrians to access the station concourse.
