

# More Trains, More Services

## Arncliffe Station Canopy Extension

### What are we doing at Arncliffe?

Transport for NSW is extending the platform canopy at Arncliffe Station. The extended canopy will increase weather protection and encourage customers to use the length of the platform, reducing crowding at busy times

### What happened last month?

Platform work continued with drainage being installed on the platform, and the brick planter boxes were started. Electrical and cabling work in the station building continued.

### What's planned next?

In November, our activities will include:

- relocating station furniture
- installation of a glass canopy roof on the platform
- resurfacing asphalt sections of the platform
- station services installation will continue
- bird proofing the new canopy.

Tools and equipment to be used include: mobile work platforms, hand tools, asphalt plant and machinery.

### When will construction take place?

To support the construction industry through the COVID-19 pandemic, the NSW Government has extended an amendment to the legislation regarding standard construction hours. This amendment enables activities to be carried out between **7am and 6pm Monday to Sunday and public holidays.**

Some construction work will take place outside of these hours between:

- **5am Saturday 13 November through to 10pm Sunday 14 November**

This work will take place during a scheduled Sydney Trains trackwork period when no trains will be running. Scheduling construction work outside of standard construction hours enables our project team to complete essential activities safely. There will be signage directing people to alternative transport.

All work is dependent on weather and site conditions and is subject to change.

## Will the commuter car park be affected?

The commuter carpark will be closed from 10 pm Thursday 11 November until 12 am Monday 15 November to allow for plant and equipment to access the work site. Signage will be erected for pedestrians to access the station concourse.

## How do we consider the community?

The project team understands construction activities may cause some disruption for the community and we will seek to minimise impacts as much as possible.

When carrying out our work, the project team utilises a noise assessment of the programmed activities to determine the noise to be generated and the appropriate mitigation measures to be put in place. We will also continue to ensure we adhere to strict environmental conditions relating to vibration and dust management.

Thank you for your understanding and patience while we complete this important work.

## How are we staying safe?

In line with current Australian Government guidelines around slowing the spread of Coronavirus the site will have a dedicated Covid Marshall as per current NSW Health guidelines and all necessary hygiene practices will be observed.

If you require the services of an interpreter, please contact the Translating and Interpreting Service on 131 450 and ask them to contact Transport for NSW on 1800 684 490.

An interpreter will assist you with translation.

## About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
