

# More Trains, More Services

## Arncliffe Station Canopy Extension

### What are we doing in Arncliffe?

Transport for NSW is extending the platform canopy at Arncliffe Station.

The extended canopy will increase weather protection and encourage customers to use the full length of the platform, reducing crowding at busy times.

### What happened in July and August?

During July and August, the following activities were completed:

- Site investigations
- Site surveying requirements for drainage

### What's planned next?

During September, our activities will include:

- Full Re-mobilisation to site
- Deliveries of structural steel and metal roofing
- Plant and equipment deliveries

- General site investigations
- Electrical works in the station building
- In-ground drainage works on the platforms
- Installation of structural steel and metal roofing for new canopies.

### When will construction take place?

Standard construction hours are 7am to 6pm Monday to Friday and 8am to 1pm on Saturdays.

The NSW Government has allowed construction sites to work extended hours across weekends and public holidays (*to 6pm on Saturdays and 7am-6pm on Sundays and public holidays*) throughout the COVID-19 pandemic. These extended work hours enable the construction industry to practice appropriate social distancing with fewer workers on site on any given day by allowing work to be spread across more days in the week.

## Are there activities planned outside standard construction hours?

Some work will also take place outside of standard construction hours inside the rail corridor during a scheduled trackwork period when no trains will be running from **5am Saturday 11 September to 10pm Sunday 12 September**.

This work is dependent on weather and site conditions and is subject to change.

## What equipment will be used?

During this time diesel generator, high pressure gurneys, impact drivers, rattle guns and hand tools, excavators, dump trucks, mobile crane, telehandlers, scissor lifts and sucker trucks will be used.

## How do we consider the community?

The project team understands construction activities may cause some disruption for the community and we will seek to minimise impacts as much as possible.

When carrying out our work, the project team utilises a noise assessment of the programmed activities to determine the noise to be generated and the appropriate mitigation measures to be put in place.

We will also continue to ensure we adhere to strict environmental conditions relating to vibration and dust management.

Thank you for your understanding and patience while we complete this important work.

## Will the commuter car park be affected?

From **10pm Thursday 9 September until 12am Monday 13 September**, approximately 25 parking spaces in the commuter carpark will be temporarily unavailable to allow for a mobile crane to be set up for the installation of structural steel on the platforms.

## The commuter carpark will therefore be closed for this period.

Signage will be erected for pedestrians to safely access the station concourse.

## How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community.

In line with current Australian Government guidelines around slowing the spread of Coronavirus the site will have a dedicated Covid Marshall to ensure all people entering the site have been tested for Covid-19 and are safe to enter the site (as per current NSW Health guidelines), masks will be worn at all times, and where possible all work will be carried out at with a 1.5m physical distance and all necessary hygiene practices will be observed.

## About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
