

Circular Quay Renewal

Community Update: Site Investigations

September 2023

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Project Update

Transport is committed to making our services convenient, reliable, dependable and accessible. As part of this, we are renewing Circular Quay to deliver an improved transport hub.

Upcoming works

From Thursday 28 September we're starting geotechnical investigations at Circular Quay. These investigations will help to plan and build the project.

Equipment will be used to drill holes through the pavement and rock below the ground and seabed to collect soil and rock samples.

Work includes:

- Establishing temporary work compounds
- Locating existing underground services
- Using machinery to cut into the pavement
- Drilling boreholes into the ground using specialised machinery
- Using a water barge to lower specialised equipment down to the seabed

We will restore the work areas when completed.

When and where we'll be working

The work will be at various locations across Circular Quay and will take approximately three months to complete, subject to weather conditions.

To subscribe to the email distribution list for this project, please contact projects@transport.nsw.gov.au

Circular Quay is one of the busiest places in Sydney, with passengers, workers, residents, and significant marine activity. Most of the site investigations must be undertaken at night to ensure public safety.

- **Day works** will commence from Thursday 28 September, between 7am to 6pm, Monday to Friday.
- **Night works** will commence from Sunday 8 October, between 8pm to 5am, Sunday to Thursday.

Pedestrian access in Circular Quay

Pedestrian access at Circular Quay will be maintained at all times.

Temporary work compounds will be created around Circular Quay and wharves 2-6.

What will this mean for you?

Thank you in advance for your understanding and patience as we commence this critical work to upgrade and renew Circular Quay.

Throughout these works you may notice:

- Workers and vehicles in Circular Quay
- Temporary fencing and lighting installed around the public domain
- Noise from machinery such as power saws, jackhammers, drills and vacuum trucks.

Managing our impacts

Our technical experts have prepared a Construction Noise and Vibration Management Plan. We will be able to assess the cumulative impacts of construction works.

We will stage the location and time of our work to minimise impacts to you, both during the day and at night. We will work closely with residents and businesses, and we are available to respond to your questions and feedback. We will do our best to minimise any inconvenience to you.

A range of mitigation measures will be in place, such as the installation of acoustic noise blankets on temporary fencing, directional task specific lighting and staging of more impactful works earlier in the shift where possible.

For more information

If you have any questions or concerns about this work or would like to speak to someone about the Circular Quay Renewal project, Transport for NSW and the Project team are contactable 24 hours, 7 days a week via phone on **1800 684 490** or via email, **projects@transport.nsw.gov.au**.
