

More Trains, More Services

Coniston Station Infrastructure Upgrade

More Trains, More Services

The More Trains, More Services program is upgrading the rail network to support the introduction of the Muriung fleet.

As part of the program, we are completing work at Coniston Station to accommodate the new ten-car trains which will provide greater comfort and convenience for intercity customers.

Improvements for Coniston customers include:

- installing new closed circuit television cameras for improved safety and security
- realigning and installing new signalling equipment so the new trains can operate safely and efficiently
- minor architectural work on the platform, including updated wayfinding signage, new car marker signs for the trains and installation of additional fencing.

Work on the Coniston Station Infrastructure Upgrade is scheduled for completion in mid-November 2021.

What's left to complete?

In the coming months, we will be completing:

- service relocations
- signalling upgrades
- removal of redundant infrastructure
- minor architectural work on the platform.

The driver's walkway and platform extension, which was originally included as part of this project, has been removed following further consultation with Sydney Trains and stakeholders. For operational reasons this infrastructure is no longer required.

Revised construction hours due to COVID-19

The NSW Government has introduced new rules to support industry and continue the delivery of critical infrastructure during COVID-19. In accordance with the *Environmental Planning and Assessment (COVID-19 Development – Infrastructure Construction Work Days No.2) Order 2020*, standard construction hours are 7am to 6pm Monday to Sunday, including public holidays.

Night work

In November, some activities are required to take place outside of standard construction hours, between **6pm Friday 12 November until 7am Monday 15 November**.

This work has been scheduled to take place during a Sydney Trains trackwork period when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Temporary parking changes

To enable the safe delivery of plant and material to site, we will require use of approximately eight car parking spaces in the commuter car park off Gladstone Avenue between **4pm Thursday 11 November and 11am Monday 15 November**.

Signage will be installed to assist motorists with these changes.

Minimising impacts

We understand construction activities may cause disruption for the community and every effort will be made to minimise impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

Other agencies are working in the area

To improve service reliability, Sydney Trains has also been completing track maintenance work in the rail corridor between Wollongong and Coniston.

For more information about Sydney Trains' activity, please call 131 500 or visit transportsw.info/regional.

To report environmental concerns (24hours) please call 1300 656 999.

This is your last paper notification, but you can still access updates online

As we approach the end of construction on the Coniston Station Infrastructure Upgrade, we don't anticipate any remaining activities to require distribution of a paper notification.

All work will be carried out in line with current NSW Government Public Health Orders and Restrictions, which are subject to change.

If work is postponed and expected to impact your residence, we will contact you directly to advise of any changes.

The project webpage will remain accessible, including all community notifications distributed to date. To access this content, please visit
