

More Trains, More Services

Dapto Station

Transport for NSW | April 2022

More Trains, More Services

The More Trains, More Services program is upgrading the rail network to support the introduction of the Mariyung fleet.

The Mariyung fleet will offer improved safety, accessibility, comfort, and modern features for customers who make almost 45 million journeys a year on the electrified intercity network.

As part of the program, we are extending platforms, upgrading infrastructure and re-building the maintenance shed at Dapto Station.

What's next at Dapto?

In April, work at Dapto will involve:

- demolishing the old maintenance shed and the construction of a new shed on Sydney Trains' land north of the main station entrance
- relocating existing accessible car parking spaces from the commuter car park

- installing new signal bases and underground services inside the rail corridor
- preparation work for the platform extension including earthwork and piling activities
- drainage work and relocating existing services.

Upcoming night work

In April, some activities are required to take place outside of standard construction hours between **6pm Friday 8 until 7am Monday 11 April**.

This work has been scheduled to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Construction hours

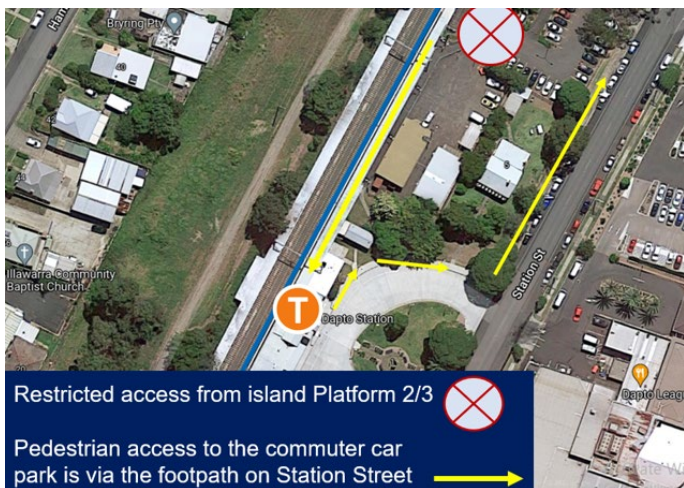

From **1 April 2022**, COVID-19 construction hours will end, and standard construction hours will revert back to **7am-6pm Monday to Friday and 8am-1pm on Saturdays**.

Temporary impacts to pedestrian access and commuter car spaces

As we commence work in the existing maintenance compound, **pedestrian access connecting the island platforms 2/3 to the commuter car park** will be restricted. A temporary pedestrian detour will be in place and signage has been installed to assist pedestrians with these changes.

Map showing temporary pedestrian detour route

For improved safety, visual amenity, and dust containment, this area will be delineated with shade cloth and hoarding.

To enable the safe demolition of the existing maintenance building, the Sydney Trains compound will be restricted and 6 commuter car spaces will be reserved for Sydney Trains staff parking until October 2022.

Other temporary changes to parking include the relocation of accessible parking spaces. Three spaces will be relocated to the front of the station, and another accessible space will be reserved in the commuter car park. Signage will be in place to assist customers with these temporary changes.

Other projects in the area

Planning is currently under way to improve accessibility at Dapto Station as part of the Transport Access Program. This program aims to provide stations which are accessible to those with a disability, limited mobility, parents/carers with prams and customers with luggage.

Among the More Trains More Services work that you will start to see over the coming weeks, we will be

undertaking geotechnical investigations on site as part of the planning process. We will keep you informed as the project progresses. For more information about the Transport Access Program upgrade, please visit

How can we better communicate with you?

We strive to develop and maintain strong relationships with our closest neighbours, businesses, customers and stakeholders within the communities in which we work. We would like your feedback on the way we keep you informed about construction activities. If you would like to provide your feedback, please scan the QR code below or visit yoursay.transport.nsw.gov.au/community-engagement
