

## More Trains, More Services

### Dapto Station

Transport for NSW | July - September 2022

#### More Trains, More Services

The More Trains, More Services program is upgrading the rail network to support the introduction of the Mariyung fleet.

The Mariyung fleet will offer improved safety, accessibility, comfort, and modern features for customers who make almost 45 million journeys a year on the electrified intercity network.

As part of the program, we are extending platforms, upgrading infrastructure and re-building the maintenance depot at Dapto Station.

#### What's next at Dapto?

Between July and September, work at Dapto will include:

- Excavation activities to support the installation of concrete piles for future platform extensions and enable drainage upgrades
- Demolition of old, and installation of new, steel structures, supporting wires over Platforms 1 and 2
- Delivery of rail materials
- Installing foundations for overhead wiring work

- Installing pile foundations to enable future platform extension works
- Capping beam work (steel and concrete activities) to tie the piling elements together
- Installation of structural steel for maintenance building.

#### Upcoming night work

In early July, we have scheduled a track delivery to take place outside of standard construction hours (7am-6pm Monday to Friday, and 8am-1pm Saturdays), to minimise impacts on motorists and enable the project team to safely unload the materials. This delivery will take place over a **two-hour period between 6pm Tuesday 5 and 7am Wednesday 6 July 2022.**

We also have some night work scheduled to take place during a Sydney Trains trackwork period when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

This work will take place between **6pm Friday 5 August until 7am Monday 8 August.**

Some minor activities like site clean-up may also be required to take place at night, however this work is not expected to impact the community. We will contact you directly if out of hours work is anticipated to be noticeable at your address.

Concrete slab foundation work being completed at the location of the old maintenance centre, in preparation for the new one

## Minimising community impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration, and dust management.

As a result of community feedback, we have recently procured additional geofabric to cover stockpiles when not in use and positioned a new sprinkler system in our compound to improve our dust suppression measures.

If you identify an area we could be doing better, please don't hesitate to let us know through the formal contact avenues listed in the 'contact us' box below.

## Other projects in the area

Planning is currently under way to improve accessibility at Dapto Station as part of the Transport Access Program. This program aims to provide stations which are accessible to those with a disability, limited mobility, parents/carers with prams and customers with luggage.

We will keep you informed as the project progresses. For more information about the Transport Access Program upgrade, please visit [transport.nsw.gov.au/dapto](https://transport.nsw.gov.au/dapto)

## How can we better communicate with you?

We strive to develop and maintain strong relationships with our closest neighbours, businesses, customers and stakeholders within the communities in which we work. We would like your feedback on the way we keep you informed about construction activities. If you would like to provide your feedback, please scan the QR code or visit [yoursay.transport.nsw.gov.au/community-engagement](https://yoursay.transport.nsw.gov.au/community-engagement)
