

Dapto Station

November 2022

Upcoming night work

As part of More Trains, More Services program construction work is being completed at Dapto Station.

Night works are planned from **6pm Tuesday 29 November until 7am Wednesday 30 November 2022** to complete some electrical work. This work has been scheduled outside of standard construction hours when train usage is drastically reduced to minimise disruptions to commuters and improve the safety of staff.

We will be working closely with Sydney Trains to safely isolate power to the station so we can decommission a transformer and complete other electrical activities to support ongoing station upgrade work.

To complete these activities, we will be using some electric power tools. This work will generate some noise but it is not predicted to be intrusive.

Please contact us with any questions or concerns.
