

More Trains, More Services

Dapto Station

More Trains, More Services

The More Trains, More Services program is upgrading the rail network to support the introduction of the Mariyung fleet.

The new 204-metre-long fleet of trains will provide greater comfort and convenience for south coast customers.

As part of the program, we are extending platforms at Dapto Station so customers can safely access all carriages on the new fleet of longer trains.

Improvements at Dapto Station include:

- extending Platform 1 by approximately eight metres and the track on Platform 3 by approximately 30 metres
- upgrading lighting, closed circuit television, the passenger announcement system, tactile paving and line marking for improved customer safety as required

- realigning and installing new overhead wiring and signalling equipment
- demolishing existing and constructing a new maintenance building and track modifications.

What's happening at Dapto Station?

We have started site surveys and geotechnical activities at Dapto Station in preparation for the platform extensions and a new maintenance building.

Site establishment

In the coming weeks, we will be setting up a site compound on Sydney Trains land, north-east of the station off Station Street (as indicated in the image overleaf).

The compound will be operational during standard construction hours (**7am-6pm Monday to Friday**) and used for office sheds, material storage and construction vehicle parking.

Compound location

For improved safety, visual amenity, and dust containment, this area will be delineated with shade cloth. The shade cloth will be printed with the project contact details to enable members of the community to contact the project team in relation to our activities at this location.

We're reducing our paper footprint

In an effort to reduce our environmental impact, we are minimising our paper production on this project.

Unless our activities are rescheduled or new impacts are identified, we don't anticipate delivery of another paper notification this year.

The project webpage will remain accessible, including all community notifications distributed to date. To access this content, please scan the QR code or visit the project webpage yoursay.transport.nsw.gov.au/mtms-dapto

If work is postponed and expected to impact your residence, we will contact you directly to advise of any changes.

Minimising community impacts

The project team understands that construction activities may cause disruption for the community and every effort will be made to minimise impacts where possible, including conducting on-site monitoring to ensure compliance with strict environmental conditions. relating to noise, vibration and dust management.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
