

# Work continuing: Doonside Station Upgrade

## Transport Access Program

November 2023

Transport for NSW acknowledges the Dharug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

### What work are we doing?

We will carry out the following works:

- landscaping and public domain works in Eastwood Lane and Cross Street
- installing wayfinding and signage
- testing and commissioning of new lifts
- electrical, rectification and finishing works

### When and where we'll be working?

In November, work at the station will continue Monday to Friday from 7am to 6pm and from 7.30am to 5.30pm on Saturdays and Sundays.

Some activities will be carried out on Saturday 18 November and Sunday 19 November from 6am to 6pm during the scheduled Sydney Trains track work.

### What will this mean for you?

You may notice:

- there will be periods of high noise
- footpath closure - the footpath on Eastwood Lane Cross Street, will be closed at times to allow for civil works. Traffic control will be in place to guide pedestrians around the work area
- increase in construction traffic - construction vehicles will access the rail corridor via the

access gate on School Parade. At times, temporary parking removal will be required to provide access

- laydown areas - these secured areas on Coghlan Crescent and Rosenthal Street are required to store materials and support work outside the rail corridor

### Changes to scheduled works

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

### Managing our impacts

We will do everything we can to avoid disruption while we work and will put measures in place to reduce the disturbance to the community and the environment.

This includes:

- reducing our noise as much as possible
- using noise blankets where possible, replacing reversing beepers with clickers
- using traffic control and signage
- using directional lighting pointed away from residential properties wherever possible
