

# Doonside Station Upgrade Community Update

## Transport Access Program

July 2023

Transport for NSW acknowledges the Dharug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

### What work are we doing in July?

Work includes:

- Civil, concrete, steel and glazing work to construct the new lifts, landings and canopies
- Refurbishment of footbridge
- Installation of platform canopy steel columns & roof structural steel
- Excavating and trenching on Cross Street, and School Parade
- Landscaping and upgrading the footpaths and roads around the station
- Installing electrical and communication services
- Tree trimming on Eastwood Lane
- Fitout of lifts

### When and where we'll be working

In July, work at the station will continue **Monday to Friday from 7am until 6pm, and from 8am until 1pm on Saturdays.**

Some activities are required to be carried out outside of our standard work hours. These activities have been planned during a scheduled Sydney Trains trackwork weekend as follows:

#### **6pm Friday 21 July to 1am Monday 24 July**

In addition, some other activities may be required to be carried out outside of our standard work hours, including occasional out-of-hours deliveries.

### What will this mean for you?

You may notice:

- At times there will be periods of high noise
- From **12am Saturday 22 July to 1am Monday 24 July**, the footbridge over the station will be closed to facilitate required works safely. A shuttle bus will be provided to ferry passengers between Hill End Road and School Parade.
- Temporary parking removal: at times, up to eight car spaces at the access gate (please see the map) on School Parade will be required to facilitate vehicle access.
- Temporary lane closure: throughout July, access to the station via Eastwood Lane (from Illoura Place) will be restricted at times to allow for paving and landscaping. Access will be maintained via Doonside Road.
- Footpath closure: the footpath on Cross Street adjacent to the station entrance, will be restricted at times to allow for Civil works. Traffic control will be in place to guide pedestrians around the work area.
- Increase in construction traffic: construction vehicles will access the rail corridor via the access gate on School Parade. At times, temporary parking removal will be required to provide access.
- Laydown areas: these secured areas on Coghlan Crescent and Rosenthal Street are required to

store materials and support work outside the rail corridor.

## Changes to scheduled works

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

## Location of works

## Managing our work

We aim to manage our work to limit our effect on the community and the environment. This includes:

- Reducing our noise as much as possible
- The use of noise blankets where possible, replacing reversing beepers with clickers
- Traffic control and signage will be in place
- Directional lighting pointed away from residential properties wherever possible.
