

Doonside Station Upgrade Community Update

Transport Access Program

April 2023

Transport for NSW acknowledges the Dharug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

What work are we doing in April?

We will carry out the following works:

- civil, concrete, steel and glazing work to construct the new lifts and canopies
- excavating and trenching on Cross Street, and School Parade
- landscaping and upgrading the footpaths and roads around the station
- installing electrical services and electrical pits
- upgrading and cutover of station services

Our work hours

In April, work at the station will continue **Monday to Friday from 7am until 6pm, and from 8am until 1pm on Saturdays.**

Some activities are required to be carried out outside of our standard work hours. These activities have been planned during some scheduled Sydney Trains trackwork weekends as follows:

- 4am Saturday 1 to 12am Monday 3 April

What will this mean for you?

You may notice:

- there will be periods of high noise
- temporary parking removal: up to eight car spaces at the access gate (please see the map) on School Parade will be required to facilitate vehicle access
- temporary lane closure: throughout April, access to the station via Eastwood Land (from

Illoura Place) will be restricted to allow for paving and landscaping. Access will be maintained via Doonside Road.

- intermittent footpath closure: the footpath on Cross Street adjacent to the station entrance, will be restricted to allow for excavating and trenching. Traffic control will be in place to guide pedestrians around the work area.
- increase in construction traffic: construction vehicles will access the rail corridor via the access gate on School Parade. Temporary parking removal will be required to provide access.
- laydown areas: these secured areas on Coghlan Crescent and Rosenthal Street are required to store materials and support work outside the rail corridor

Changes to scheduled works

Work schedules are subject to change due to permits, weather, and site conditions. Further notification will be provided should there be a significant change to the construction program.

How the work may affect you

We aim to manage our work to limit disturbances to the community and the environment. This includes:

- reducing noise as much as possible
- use of noise blankets where possible, replacing reversing beepers with clickers
- traffic control and signage will be in place
- directional lighting pointed away from residential properties wherever possible.
