

Doonside Station Upgrade

Construction update | March 2023

The Doonside Station Upgrade is part of the Transport Access Program, which will provide a better experience for public transport customers by delivering accessible, modern, secure, and integrated transport infrastructure across the state.

What we've achieved

- Family-accessible toilet completed and open to the public
- 100% of the station building kitchenette completed
- 50% of concrete structure for lift located on Platform 3 and 4 completed
- Eastwood Lane concrete slab has been poured.

Day work continuing

In March, work at the station will continue **Monday to Friday from 7am until 6pm**, and **from 8am until 1pm on Saturdays**. This work includes but is not limited to:

- civil, concrete, steel and glazing work to construct the new lifts and canopies
- excavating and trenching on Cross Street, and School Parade
- landscaping and upgrading the footpaths and roads around the station
- upgrading and cutover of station services.

Out-of-hours work

There is no planned work outside of standard construction hours in March, however at different times throughout the project it may be necessary. This allows our team to complete activities safely.

We understand that out-of-hours work may be noisy at times. When it is necessary, we will do everything to lessen the disturbance including turning off vehicles and equipment when not in use and using non-tonal reversing beepers for trucks used on site.

Should unforeseen out-of-hours work arise, affected residents will be notified prior to the work commencing.

How the work may affect you

- **At times there will be periods of high noise:** we will make every effort to lessen the disturbance where possible, including turning equipment off when not in use and positioning equipment as far away from properties as possible.
- **Temporary parking removal:** at times, up to eight car spaces at the access gate (please see the map) on School Parade will be required to facilitate vehicle access.
- **Temporary lane closure:** From around late February, access to the station via Eastwood Lane (from Illoura Place) will be restricted at times to allow for paving and landscaping. Access will be maintained via Doonside Road.
- **Increase in construction traffic:** construction vehicles will access the rail corridor via the access gate on School Pde. At times temporary parking removal will be required to provide access.

Laydown areas: these secured areas on Coghlan Cres. and Rosenthal Street are required to store materials and support work occurring outside the rail corridor.

Where the work will take place
