

Electric Vehicle Charging Program

Penrith Station

October 2023

Transport for NSW acknowledges the Darug people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government is committed to increasing the uptake of electric vehicles, allowing more people to benefit from their cheaper running costs and a cleaner, quieter, and more sustainable transport network.

The NSW Government is installing electric vehicle (EV) chargers in commuter car parks across Greater Sydney to ensure widespread, world-class EV charging coverage so current and future EV drivers can be confident they can drive their vehicles whenever and wherever they need.

What work are we doing?

In the coming weeks, we will be installing a new, Jolt fast EV charger into an existing parking bay in the commuter car park southwest of Penrith Station, adjacent to the Great Western Highway.

Work includes:

- establishing a temporary work site
- locating existing underground services
- using machinery to trench across the road
- removing a section of the pedestrian safety fencing to enable the installation of the charging infrastructure
- minor civil work, like pouring a concrete footing, and landscaping
- restoring the area post installation.

When and where we'll be working

The installation of a new EV charging station will take approximately 3 to 5 days, and is scheduled to take place between **Tuesday 31 October and Saturday 11 November 2023.**

Standard working hours are **7am to 6pm, Monday to Friday and 8am to 1pm, Saturday.**

Temporary changes to traffic, parking and pedestrian routes

To enable the safe installation of the EV charging infrastructure, we will be required to:

- close approximately five parking spaces for a period of up to five days
- re-direct pedestrian traffic at the existing traffic lights, to the adjacent pedestrian footpath along Jane Street (150 metre stretch of footpath)
- intermittently stop traffic within the commuter car park.

Traffic control and signage will be available to assist motorists and pedestrians with these temporary changes.

What will this mean for you?

You may notice:

- workers and vehicles
- traffic controllers and signage
- car parking and footpath closures
- pedestrian and cyclist detours with construction workers on site to guide you
- noise from machinery and equipment.

Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- fencing for safety and security
- reducing our noise as much as possible

- installing signage to assist with temporary changes
- implementing traffic control measures and maintaining existing car park traffic flow where possible

Location of work area

Pedestrian Detour

What's next?

Under the NSW Electric Vehicle Strategy, we will continue to install EV charging facilities into existing and new commuter car parks across the State.

The JOLT EV Charger will go-live shortly after the installation is completed and will be available 24/7 for EV charging.

More than 50 EV charging stations will be installed in existing commuter car parks as part of the project.

The installation of the chargers will encourage drivers to use public transport, taking more vehicles off congested roads and reducing greenhouse gas emissions.

Operating the EV charging facility

The new infrastructure will be operated and maintained by JOLT. Please download the JOLT App on your phone to start using the charger. The EV charging car space will be maintained for electric vehicles only.

Scan the QR code to learn more about how to operate the new charging station or contact JOLT's 24/7 Customer Support Team on **02 5565 6000** or email support@joltcharge.com.
