

## More Trains, More Services

### Erskineville and Newtown

February to March 2023

*Transport for NSW pays respect to Elders past and present, and recognises and celebrates the diversity of Aboriginal peoples and their ongoing cultures and connections to the lands and waters of NSW.*

The More Trains, More Services program will simplify and modernise the rail network creating high capacity, turn up and go services for many customers.

Several infrastructure improvements are currently being delivered in your area as part of this program, including:

- Sydney Terminal Area Reconfiguration project – Erskineville
- Newtown to Redfern Signalling Upgrade project.

#### What work are we doing?

In February and March the project teams will undertake the following work inside the rail corridor:

- Essential investigations to locate existing underground services and confirm ground conditions
- Modifications to overhead wiring infrastructure
- Installation of new fibre cables. Once installed and commissioned, the new fibre cables will carry vital signalling information between Sydney Terminal and Erskineville Junction.

You may also notice deliveries of materials and equipment to our work areas and compounds near Macdonaldtown Stabling Yard and off Railway Parade, including works at nearby Eveleigh. The majority of deliveries will be scheduled during the day, however some deliveries will be required at night during scheduled trackwork periods.

#### When we'll be working

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Some work and deliveries will take place outside of these hours from:

- **6am to 6pm on Saturday 4 February and Sunday 5 February**
- **6am to 6pm Saturday 11 February and Sunday 12 February**
- **10pm Friday 10 March through to 2am Monday 13 March**
- **10pm Friday 17 March through to 2am Monday 20 March**

We schedule work outside of standard construction hours to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

#### What will this mean for you?

You may notice:

- an increase in workers and vehicles at the site compounds and work areas
- noise from machinery and equipment.

## Managing our impacts

We understand construction activities may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

We apologise for any inconvenience the work may cause and thank you for your patience.

Let us know how we can keep you up to date about construction work in your area.

## We are going paperless

We are committed to integrating sustainable practices into our projects and reducing environmental impacts.

Soon we will no longer be distributing paper notifications to residents on this project unless requested. Instead, we will be providing construction updates digitally. **To help us reduce paper waste and to continue receiving these updates, please scan the QR code to subscribe to email updates.**

If you wish to continue to receive paper notifications, you can request this via the QR code as well.
