

Glenfield to Campbelltown Infrastructure Upgrade

More Trains, More Services

November 2023

Transport for NSW acknowledges the Dharawal people of the Darug Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The More Trains, More Services program is simplifying and modernising the rail network creating high capacity, turn up and go services for many customers.

What work are we doing?

In November 2023, work includes:

- site survey and investigation work for future planning of construction, environment and safety controls
- identifying existing services and signalling routes
- installation of underground and above ground cable routes within the rail corridor
- installation and modifications to overhead wiring structures
- installation of signalling trackside equipment
- modifications and adjustments to Glenfield, Glenfield South and Ingleburn substations.

When and where we'll be working

In November 2023, work will be undertaken in and adjacent to the rail corridor between Glenfield and Campbelltown.

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Out of hours work

Some work is required to take place outside of standard construction hours between:

- **6pm Friday 10 November and 7am Monday 13 November 2023**
- **6pm Friday 24 November and 7am Monday 27 November 2023.**

Why we work outside of standard construction hours

We schedule work outside of standard construction hours, to take place during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- lighting from temporary lighting towers
- moderate noise from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents

conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We are going paperless

We are committed to reducing environmental impacts and are phasing out paper notifications.

Instead, we will be providing construction updates via email.

To stay informed about construction work in your area, please visit the project webpage yoursay.transport.nsw.gov.au/mtms-glenfieldtocampbelltown and complete the short survey at the bottom of the page.
