

# More Trains, More Services

## Hurstville Crossover Project

Transport for NSW | July 2022

### What are we doing?

We are upgrading the rail infrastructure near Hurstville Station to allow trains to cross over from one track to another. This will mean that local services travelling away from the city can end their journey at Hurstville Station on Platform 4 and then start their return service to the city from Platform 3.

### What's been happening?

In February we tested newly installed signalling infrastructure inside the rail corridor.

### What's planned next?

In July we will commission the new signalling infrastructure and undertake track work inside the rail corridor. As part of this work, there will be deliveries of machinery to the Forest Road compound.

### When will work take place?

Standard construction hours are **Monday to Friday from 7am to 6pm and Saturday from 8am to 1pm.**

Some work and deliveries will take place outside these hours **between 6pm Thursday 30 June through to 2am Monday 4 July.**

The work will take place during a scheduled Sydney Trains trackwork period when no trains will be running. Scheduling work during trackwork periods enables our construction team to complete essential work safely inside the rail corridor.

*There is a possibility that some of our planned work may be postponed or cancelled. To register for digital project updates, including changes to planned work, please email [projects@transport.nsw.gov.au](mailto:projects@transport.nsw.gov.au) with 'Progress updates – MTMS Hurstville' as the subject line and include your name and address.*

Work undertaken in 2021 for the Hurstville Crossover Project

## Where will work take place?

The above maps show the work areas inside the rail corridor in Hurstville and the site access points.

The site compound at Forest Road will be utilised for deliveries, storage of materials and equipment, pre-start work meetings and worker parking.

## How do we consider the community?

The project team understands construction activities may cause disruption for the community and we thank you for your patience as we carry out the work. We will adhere to strict environmental conditions relating to noise, vibration and dust management.

## Contact us

If you have any questions or would like more on the More Trains, More Services project please contact our project team:
