

More Trains, More Services

Hurstville Crossover project

What happened in October?

During October, excess material excavated at Sydney Terminal, near Central Station, was transported to the Hurstville project site for examination by archeologists.

What's planned next?

During November, as part of the archaeological assessment process, we will continue to sift through the material to ensure that we can conserve any heritage items that may be found.

On ground surveys, preparation for utilities and overhead wiring work will also be completed this month inside the rail corridor.

When will construction occur?

During November, construction will primarily take place from 7am to 6pm Monday to Friday, and 8am to 1pm on Saturdays.

Are there activities planned out of hours?

Some out of hours work is planned to complete surveys, utility and overhead wiring preparation work. These works are taking place during a scheduled trackwork period when no trains will be running. This enables the construction team to safely carry out essential activities inside the rail corridor.

- 10pm, Tuesday 24 to 4am, Wednesday 25 November
- 10pm, Wednesday 25 to 4am, Thursday 26 November.

Every effort will be made to minimise disruption to the community including non-tonal reversing alarms for construction plant and vehicles and noise monitoring.

These works are dependent on weather and site conditions and are subject to change.

How do we consider the community?

The project team understands construction activities may cause disruption for the community and we will seek to minimise impacts as much as possible.

We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.

Will alternate transport services be running this weekend?

For up to date information about replacement services during this scheduled trackwork period please visit transportnsw.info or call 131 500.
