

More Trains, More Services

Hurstville Crossover Project

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network, creating turn up and go services for many customers. It means customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.

Project update

We are making improvements on the T4 Illawarra Line and T8 Airport Line to transform the rail network and enhance train services for customers in the future.

Work started in August with site establishment. Main construction work will start in the coming months and take around one year to complete.

Work we are doing to improve the train network for customers and our staff

- building a new crossover for trains (100 metres in length) between the existing tracks so trains can cross from one track to another, which combined with other key upgrades across the network, will allow for an increase to peak services on the T4 Illawarra line
- changing and adding overhead wiring (OHW) structures, including new OHW supports beneath the existing bridge
- installing new signals and equipment so that trains can operate safely and efficiently
- modifying the existing utilities to accommodate the new signalling infrastructure
- minor changes to an existing drainage channel.

What you will notice

In September, our work includes:

- ongoing site investigation work
- survey, geotechnical and signalling investigations.

Construction hours

To support the industry and continue the delivery of critical infrastructure, the NSW Government has introduced new rules allowing construction sites to operate on weekends and public holidays.

Standard construction hours are now 7am to 6pm every day, including public holidays.

These changes have been made to make sure we can keep our work sites safe through social distancing and support the health and wellbeing of our workers.

The project team understands extending construction hours to weekends and public holidays may cause disruption for the community but all efforts will be made to minimise impacts where possible and ensure strict environmental conditions relating to noise, vibration and dust management are adhered to.

Staying Safe

We are continuing to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.
