

Kingsford to Centennial Park Walking and Cycling Improvements

Upcoming work

Transport for NSW | May 2023

We are continuing the construction work along the project alignment to build the new cycleway.

This notice outlines our expected works over the next few weeks.

Upcoming work – standard hours

Our standard construction hours are Monday to Friday, 7am to 6pm and Saturday, 7.30am to 3.30pm. Work is dependant on weather and site conditions and is subject to change.

Please refer to the maps overleaf for detailed locations of upcoming work.

- Continue electrical work between Alison Road and Anzac Parade. This includes private connections to some properties on Doncaster Avenue. Individual residents will be notified in advance – **up to 5 days of work**
- Continue subsoil drainage, pavement work, driveway pouring and electrical works on Doncaster Avenue between Anzac Parade and Day Avenue – **up to 20 days of work**
- Continue pavement and concrete work on Houston Road between Day Avenue and Barker Street – **up to 20 days of work**
- Commence construction of raised crossing at Houston Road near Barker Street. Detours will be in place and residents will be notified in advance – **up to 15 days of work**

Upcoming work – out of hours

Most work will be completed during the day, however, to maintain safety for road users and workers, and to keep people moving on local roads, we need to carry out some of our work outside normal construction hours.

Upcoming out of hours activity includes:

- Electrical work at the intersection of Doncaster Avenue and Darling Street – **up to two nights of work**

This work will occur between 7pm and 5am, Sunday to Thursday dependant on weather and site conditions. We do not work public holidays.

Minimising community impact

Our work activities will require the use of machinery that generates noise and vibration. Equipment used for these activities include saw-cutter, excavator, concrete truck, compaction equipment, vacuum truck and excavators.

If work is required out of hours, we will also use mobile lighting towers.

To minimise the impact of this work we will:

- monitor noise periodically so we can manage any potential impacts and adjust our work as required
- fit equipment with devices to minimise noise, particularly non-tonal reversing beepers.

In addition, at night we will also:

- complete the noisiest activities such as saw-cutting and jackhammering by midnight
- direct temporary lighting down and away from houses
- turn off machinery when not in use
- use noise blankets to minimise noise, where feasible.

We will work with residents near this work to minimise impacts.

All work will be carried out in line with project environmental approvals.

the project webpage

Site compounds

Site compounds were established in 2022 and will continue to be used throughout the project for the storage of materials and equipment, site offices and work amenities.

Our site compounds may be used during our standard and out of hours work and plant and machinery may be in operation during this time.

Currently, our two site compounds are located on Bass Street at the intersection of Anzac Parade and on Houston Road near the intersection of Strachan Street.

Traffic and pedestrian path changes

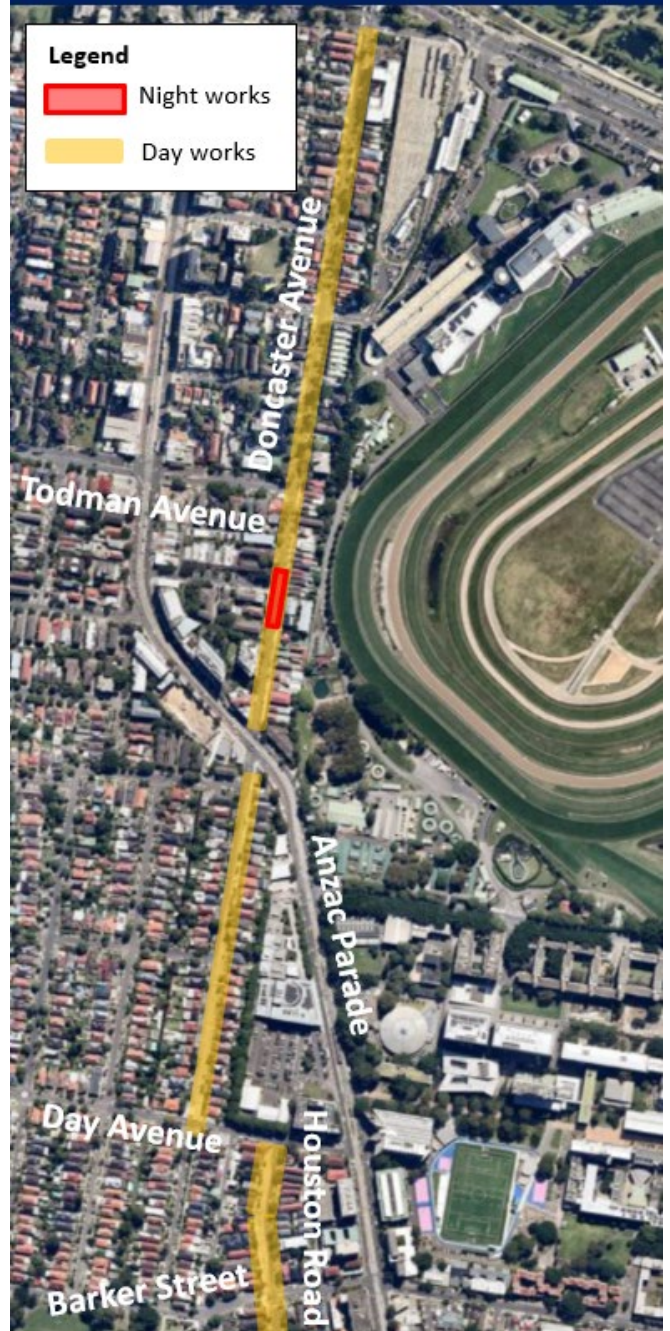

There will be temporary lane closures to ensure the safety of road users and workers and temporary changes to parking.

There may be partial footpath closures near our work area and alternative path and signs will be in place.

We may also have detours in place for some of our work. Properties affected by these detours will be notified directly.

Please allow extra travel time, keep to speed limits and follow signs and traffic controller directions. For the latest traffic updates, call 132 701, visit livetraffic.com or download the Live Traffic NSW app.
