## Wharf approach structure – La Perouse

August 2023

Transport for NSW acknowledges the Gweagal and Bidjigal people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

### What work are we doing?

Upcoming work activities at La Perouse include:

- From **Monday 28 August** we will start excavating rock to prepare for installation of the new landside wharf approach structure (called an abutment).
- The approach structure will connect the landside pathway to the new wharf.
- The rock excavation work will take up to two weeks to complete.
- We will work during normal daytime hours **7am to 6pm, Monday to Friday** and **8am to 1pm, Saturday**.
- A reminder that from **late August** we will deliver large equipment and wharf components to our site. Some of these will be delivered **during the night** to meet road safety requirements.

All work activities and dates are subject to weather and site conditions.

### Rock excavation works

- We will be working inside our main construction site at La Perouse.
- We will use machinery such as rock saws and road saws to cut into the rock, and excavators with different attachments to hammer and break the rock apart.
- The rock pieces will be loaded onto trucks and removed from site.
- At times, noise levels may be higher than what you may have previously experienced.

### Reducing our impacts

We will:

- provide breaks throughout the rock hammering work
- spray water on the work areas to control dust
- carry out the work as outlined in the Construction Heritage Management Plan
- closely monitor the vibration and noise impacts of this activity.

### Other work in the area

Randwick City Council are reconstructing the retaining wall at Frenchman's Bay Reserve. For more information about their work, please contact Ally Civil **0449 635 886** or the Council.

### Thank you to the community

Thank you to those who participated in our recent community forum. The presentation slides are on our webpage. Details of future sessions will also be shared on our webpage.

### Contact us

Please contact the project team if you have any questions or would like more information:
