Piling work at La Perouse

July 2023

Transport for NSW acknowledges the Gweagal and Bidjigal people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

What work are we doing?

From **Monday 10 July 2023** we will start piling work at La Perouse.

Piling work will take around five months to complete. The work will be intermittent and dependent on weather and marine conditions.

The piling work will take place during our normal daytime hours **7am to 6pm, Monday to Friday** and **8am to 1pm, Saturday**.

What is piling?

Piling is the process of installing steel piles into the ground or seabed. We will use a variety of piling methods during the project – this is because of the different types of soil and ground conditions across the sites.

For more information about the work visit our website.

What will this mean for you?

Some of the piling work will be noisy, particularly the impact hammering work, although this work is usually the shortest part of the installation process.

The noise level experienced by people will depend on how close you are to the work area and factors such as the ground and weather conditions.

We will not conduct noisy piling for more than three hours at a time with a one-hour break (respice period) provided before we start again.

You may also feel vibration during our drilling and piling activities. The effect of this work also varies depending on distance from the work area and factors such as ground conditions.

Vibration is a normal occurrence for this type of work and should not be a cause for concern.

Vibration and noise monitoring will be carried out during the works and in accordance with the approved Noise and Vibration Management Plan.

Safeguarding the environment

We will start piling work slowly (called a 'soft start procedure') to help encourage marine life to disperse from the area as work begins.

Marine Mammal Observers will keep an eye out for marine mammals, such as whales and dolphins, during piling work and stop work if any come close to the work zone.

Contact us

If you have any questions or would like more information, please contact our project team on:

Phone: **1800 718 556**
