

More Trains, More Services

Kingsgrove to Beverly Hills Asset Rationalisation

More Trains, More Services

The More Trains, More Services program is delivering rail asset upgrades between Sydney's CBD and the South Coast to support the introduction of the New Intercity Fleet called the Mariyung.

This important work will simplify and modernise the rail network, creating high capacity services and an improved level of comfort and convenience for customers.

What has been happening?

We have been completing excavation and concreting activities inside the rail corridor between Kingsgrove and Beverly Hills stations to enable the installation of overhead wiring structures to support improved network capacity.

What's next?

In August, our construction team will be:

- removing redundant overhead wiring and signalling infrastructure
- installing new signalling equipment and overhead wiring structures
- removing old rail and replacing it with new rail.

How we are keeping our sites safe

We are continuing to deliver projects across New South Wales while ensuring the safety of all staff and the community.

All work will be carried out in line with current NSW Government Public Health Orders and Restrictions.

Night work

In August, some activities are required to take place outside of standard construction hours (7am-6pm). This work has been scheduled during a Sydney Trains trackwork period when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

Work outside standard construction hours is scheduled to take place between
7pm Friday 20 until 6am Monday 23 August.

These times are subject to change as a result of NSW Government Public Health Orders and Restrictions. For up to date information, please visit yoursay.transport.nsw.gov.au/mtms-kingsgrove

For up to date information about alternative transport services during these times, please visit transportnsw.info or call 131 500.

Temporary parking and traffic changes

Between **5pm Monday 16 and 5pm Friday 27 August**, we will require the use of 60 car parking spaces for the safe delivery of machinery and equipment between Beverley Hills and Kingsgrove stations.

We will temporarily reserve 30 spaces off Tooronga Terrace and 30 spaces off Morgan Street, as indicated in the image below.

A traffic control plan will be in place to minimise disruptions to motorists and signage will be installed in advance to reserve these spaces.

Minimising community impacts

The project team understands that construction activities may cause disruption for the community and every effort will be made to minimise impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community.
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- installing noise barriers to shield residents from high impact noise activities
- conducting on-site monitoring to ensure compliance with strict environmental conditions relation to noise, vibration and dust management.

An interpreter will assist you with translation.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.
