

## More Trains, More Services

The More Trains, More Services program is delivering rail asset upgrades between Sydney's CBD and the South Coast to support the introduction of the Mariyung Fleet.

As part of the program, we are removing redundant track and infrastructure from the rail corridor between Beverly Hills and Kingsgrove stations. This work will facilitate improved movement and management of train services and remove unnecessary maintenance costs.

From January until March next year, we will continue removing redundant cables and upgrading signaling infrastructure to improve capacity on the network. All of our activities are scheduled to take place during standard construction hours (7am-6pm) and are not expected to impact local residents.

The More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services with less wait times, less crowding and more seats on a simpler, more reliable network.
