

Lidcombe Infrastructure Upgrade

More Trains, More Services

April 2023

Transport for NSW acknowledges the Buttamattagal people of the Darug Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

What work are we doing?

Electrical upgrades and track modifications are required to improve train movements through Lidcombe. We will be working within and adjacent to the rail corridor to:

- remove, relocate and reconfigure track and signalling infrastructure
- modify electrical assets and combined service routes, including the removal of high-voltage cables
- upgrade overhead wiring and structures
- improve drainage systems
- complete civil and structural activities to support corridor upgrades.

When and where we'll be working

In the coming months, work will be carried out within and adjacent to the rail corridor at Lidcombe and include:

- investigation activities
- signalling work
- cabling and wiring installation
- general civil enabling works.

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Why we work outside of standard construction hours

We schedule work outside of standard construction hours, to take place during Sydney Trains trackwork periods when no trains are running, minimising

disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- noise from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We are going digital

We are committed to integrating sustainable practices into our projects and reducing environmental impacts.

By mid-2023, we will no longer distribute hard copy notifications to residents on this project unless requested.

Please scan the QR code and complete the short survey to let us know how you would like to receive project updates.

If our work is anticipated to directly impact your property and we do not have your contact details, we will still distribute a paper notification to your address to ensure you are aware of upcoming activities.

If you wish to continue to receive paper notifications, you can request this via the QR code as well.
