

Lidcombe Infrastructure Upgrade

More Trains, More Services

February 2023

Transport for NSW acknowledges the Burramattagal people of the Darug Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present. We recognise & celebrate the diversity of Aboriginal peoples and their ongoing cultures & connections to the lands and waters of NSW.

The More Trains, More Services program will simplify and modernise the rail network creating high capacity, turn up and go services for many customers. The next stages of the program include integrating Sydney Metro City and Southwest into Sydney's train network.

What work are we doing?

Electrical upgrades and track modifications are required to improve train movements through Lidcombe. We will be working within and adjacent to the rail corridor to:

- remove, relocate and reconfigure track and signalling infrastructure
- modify electrical assets and underground services, including the removal of high-voltage cables
- upgrade overhead wiring and structures
- improve drainage systems
- complete civil and structural activities to support corridor upgrades.

When and where we'll be working

Work will be carried out in February in the rail corridor at Lidcombe and include:

- investigation activities, including site walks and scanning for underground services
- signalling investigation and correlation work
- overhead wiring removal and adjustment work
- general civil enabling works.

We have also established a temporary site-shed setup inside the rail corridor, adjacent to Samuel Street.

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

Weekend work

Some work is required to take place outside of standard construction hours on this project.

From **6pm Friday 10 February until 7am Monday 13 February** we will be working outside of standard construction hours.

Why we work outside of standard construction hours

We schedule work outside of standard construction hours, during Sydney Trains trackwork periods when no trains are running, minimising disruptions to commuter services and improving the safety of our construction team and customers.

What will this mean for you?

You may notice:

- workers and vehicles
- noise from machinery and equipment.

Postponed or cancelled work

Due to several factors associated with work in the rail corridor, there is always a possibility that some of our planned work may be postponed or cancelled. If you would like to be

updated or cancelled work, please contact us through the formal avenues listed below.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- directing lighting away from residents
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

We are going digital

We are committed to integrating sustainable practices into our projects and reducing environmental impacts.

In 2023, we will no longer distribute hard copy notifications to residents on this project unless requested.

Please scan the QR code and complete the short survey to let us know how you would like to receive project updates.

If our work is anticipated to directly impact your property and we do not have your contact details, we will still distribute a paper notification to your address to ensure you are aware of upcoming activities.
