

Lidcombe Infrastructure Upgrade

As part of More Trains, More Services work on the Lidcombe Infrastructure Upgrade, some deliveries will take place **between 11pm Thursday 21 September and 5am on Friday 22 September 2023.**

Delivery vehicles will travel along William Street and New Street West to access site compounds and laydown areas adjacent to the rail corridor.

You may notice some noise during this period and every effort will be made to minimise impacts, including turning off vehicle engines when not in use.

This work has been scheduled at night when traffic flow is reduced to minimise disruptions to motorists and improve the safety of our construction team and customers.

We would like to thank you, our closest neighbours, for your ongoing support as we work to deliver an improved rail network.
