

More Trains, More Services Albion Park Substation Work

Transport for NSW | June 2022

More Trains, More Services

The More Trains, More Services program will simplify and modernise the rail network. To improve train services for customers on the south coast, platform extensions and asset upgrades are required at several stations along the T4 Illawarra Line.

What's happening at Albion Park?

In the coming months we will be working in and around the rail corridor:

- completing cable work and electrical upgrades to support the installation of additional rail infrastructure and improved rail services
- upgrading the perimeter fence for improved safety and security
- improving the earthing and bonding system 800 meters each side of the substation
- trenching for underground cable containment
- upgrading overhead wiring.

Standard construction hours

Standard construction hours on this project are

7am-6pm Monday to Friday and 8am-1pm on Saturdays.

Night work

From **6am Saturday 18 June until 6pm Sunday 19 June 2022**, we will be working outside of standard hours at the Albion Park substation, adjacent to the rail corridor behind Storage King. This work is not expected to be audible to the local community.

We will contact you directly if our work outside of standard construction hours is anticipated to impact your property.

How we are reducing paper waste

In the 2018-2019 financial year, Australia generated 5.9 million tonnes of paper and cardboard waste.

We are exploring ways to better connect with the communities we work in while minimising impacts on the environment. To help us reduce paper waste, please visit yoursay.transport.nsw.gov.au/mtms-albionpark or scan the QR code below to complete a 3-question survey and let us know if you would prefer to receive our updates via email. We will consider no response as an indication you are open to visiting the project webpage for construction updates, and supportive of the project reducing paper notifications, where possible.
