

# Sydney West Overhead Wiring Upgrade – Ashfield

## More Trains, More Services

January 2024

Transport for NSW pays respect to Elders past and present, and recognises and celebrates the diversity of Aboriginal peoples and their ongoing cultures and connections to the lands and waters of NSW.

The More Trains, More Services program will simplify and modernise the rail network creating high capacity, turn up and go services for many customers. It means customers can expect more frequent train services, with less wait times, less crowding on a simpler and more reliable network.

This project will upgrade the infrastructure inside the rail corridor at Ashfield to improve train movements through the station.

### What work are we doing?

In January 2024 we will install and commission new signalling infrastructure, as well as remove redundant wiring. We will also install a new speed board sign for train drivers.

### When and where we'll be working

Work will take place inside the rail corridor. We will also establish a temporary site compound on Grimmond Avenue as shown on the map overleaf.

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

For the safety of our workers, some work will take place outside of standard construction hours from **10pm Friday 12 January to 2am Monday 15 January 2024.** This work will happen during a scheduled Sydney Trains trackwork period when no trains will be running.

### What will this mean for you?

You may notice:

- an increase in workers and vehicles
- noise from machinery and equipment
- lighting from temporary lighting towers.

### Managing our impacts

We understand construction activities may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

We apologise for any inconvenience the work may cause and thank you for your patience.
