

Newtown to Redfern Signalling Upgrade

More Trains, More Services

October 2023

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The More Trains, More Services program will simplify and modernise the rail network creating high capacity, turn up and go services for many customers.

What work are we doing?

We will construct two new footings inside the rail corridor that will serve as the foundation for new signalling infrastructure. The work will involve excavation and concreting activities.

We will also install a new rail traffic signal and carry out excavation work near Newtown Station.

Example of a new concrete footing

Example of a rail traffic signal

When we'll be working

Standard construction hours are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

For safety reasons, some work and deliveries will take place outside of these hours from **10pm Friday 13 October to 2am Monday 16 October 2023** when no trains are running.

We are going paperless

Soon we'll no longer be distributing paper notifications (unless requested) to reduce our environmental impacts.

Instead, we will contact you via email when there is work or deliveries that may impact you.

If you haven't already registered, please scan the QR code and fill out the form.

If you wish to continue to receive paper notifications, you can request this via the QR code or call us at 1800 684 490.

Thank you to residents who have already registered.

Where we'll be working

We will be working inside the rail corridor and the compounds on Angel Street and Burren Street as shown on the map overleaf. The compounds will be used for deliveries, storage of materials and equipment, worker briefings, amenities and parking.

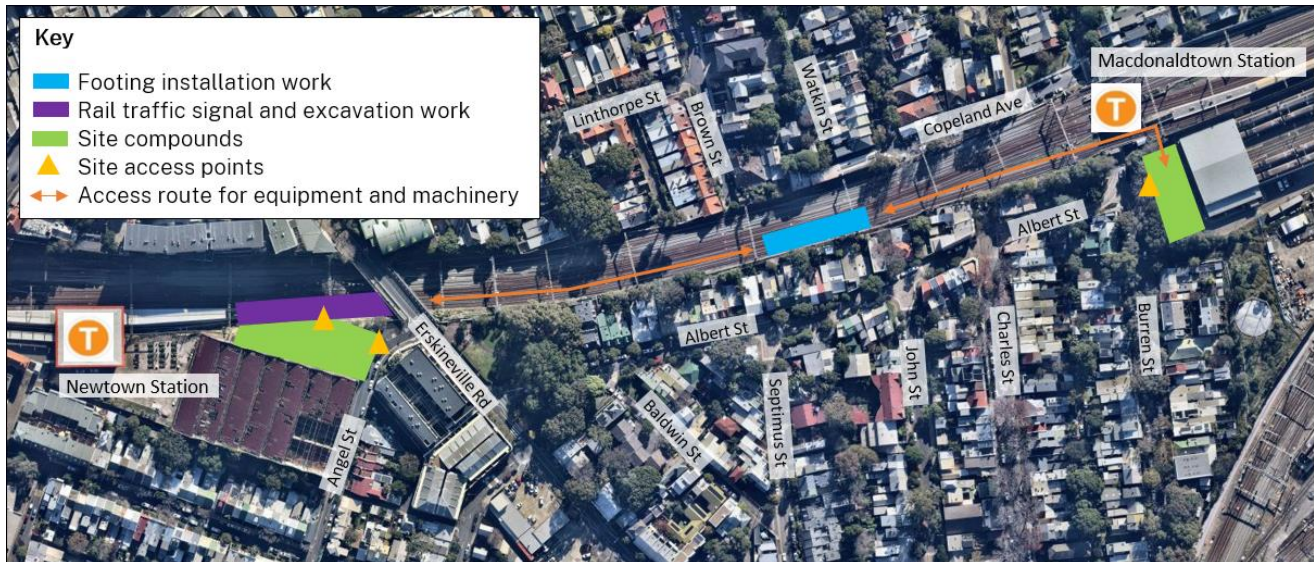

What will this mean for you?

You may notice:

- workers and vehicles
- noise from machinery and equipment
- lighting from temporary lighting towers.

Location of work

Managing our impacts

We understand our work may cause disruption for the community. We will seek to minimise impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.
