

# More Trains, More Services

## Sydney Terminal Area Reconfiguration Project – Central

We're upgrading the rail infrastructure between Sydney Terminal and Erskineville Junction, to support the introduction of the new fleet of trains operating on the South Coast Line which will access platforms 1 to 14 at Central Station.

### What has happened lately?

In February, we installed the overhead wiring footings, continued work on platforms 9 and 10 and carried out signalling work at Sydney Terminal.

### What's planned next?

In April, we will be completing the following activities:

- track work
- installation of overhead wiring infrastructure
- finishing work on platforms 9 and 10
- installation of utilities
- removal and installation of drainage
- deliveries of infrastructure and materials.

Construction activities will take place during our standard construction hours from 7am to 6pm Monday to Friday, and 8am to 1pm on Saturday.

### Are there activities planned outside standard construction hours?

Some work will be completed outside of standard construction hours. The work will occur from:

- 6pm, Wednesday 7 April to 7am, Thursday 8 April
- 6pm, Thursday 8 April to 7am, Friday 9 April
- 2am, Saturday 10 April to 2am, Monday 12 April.

Scheduling work outside of standard construction hours enables the construction team to safely carry out essential activities inside the rail corridor.

This work is dependent on weather and site conditions and is subject to change.

### Where will work take place?

The above map shows the project area in the Central Station intercity train yard. The project site compound is located at Mortuary Station.

This work is an essential stage in transforming the rail network in this area so that train services can be improved in the future.

### How do we consider the community?

The project team understands that work may cause disruption for the community and we will seek to minimise impacts as much as possible. We will take care to minimise noise as teams enter site via our Lee Street access point. We will ensure strict adherence to environmental conditions relating to noise, vibration and dust management whilst construction takes place.

### Will alternate transport services be running during scheduled track work?

For up to date information about replacement services during this scheduled trackwork period please visit [transportnsw.info](http://transportnsw.info) or call 131 500.

Currently there are multiple project teams, transport agencies and contractors working within the Central rail corridor. For more information on work completed by Sydney Trains, please contact 1300 656 999, or visit [www.transport.nsw.gov.au/sydtraincommunity](http://www.transport.nsw.gov.au/sydtraincommunity).
