

More Trains, More Services

Sydney Terminal Area Reconfiguration Project – Central

What happened in December?

During December, we installed the overhead wiring portal, signalling equipment, and utilities at Sydney Terminal. The Project Team also extended platforms 9 and 10 at Central Station.

What's planned next?

During February, we will carry out the following activities:

- deliveries of oversized infrastructure and materials
- installation of signal wiring
- installation of a cable route and pit for signalling
- installation of overhead wiring footings
- installation of a drainage pad

Construction activities will be undertaken during standard construction hours from 7am to 6pm Monday to Friday, and 8am to 1pm on Saturday.

Are there activities planned out of hours?

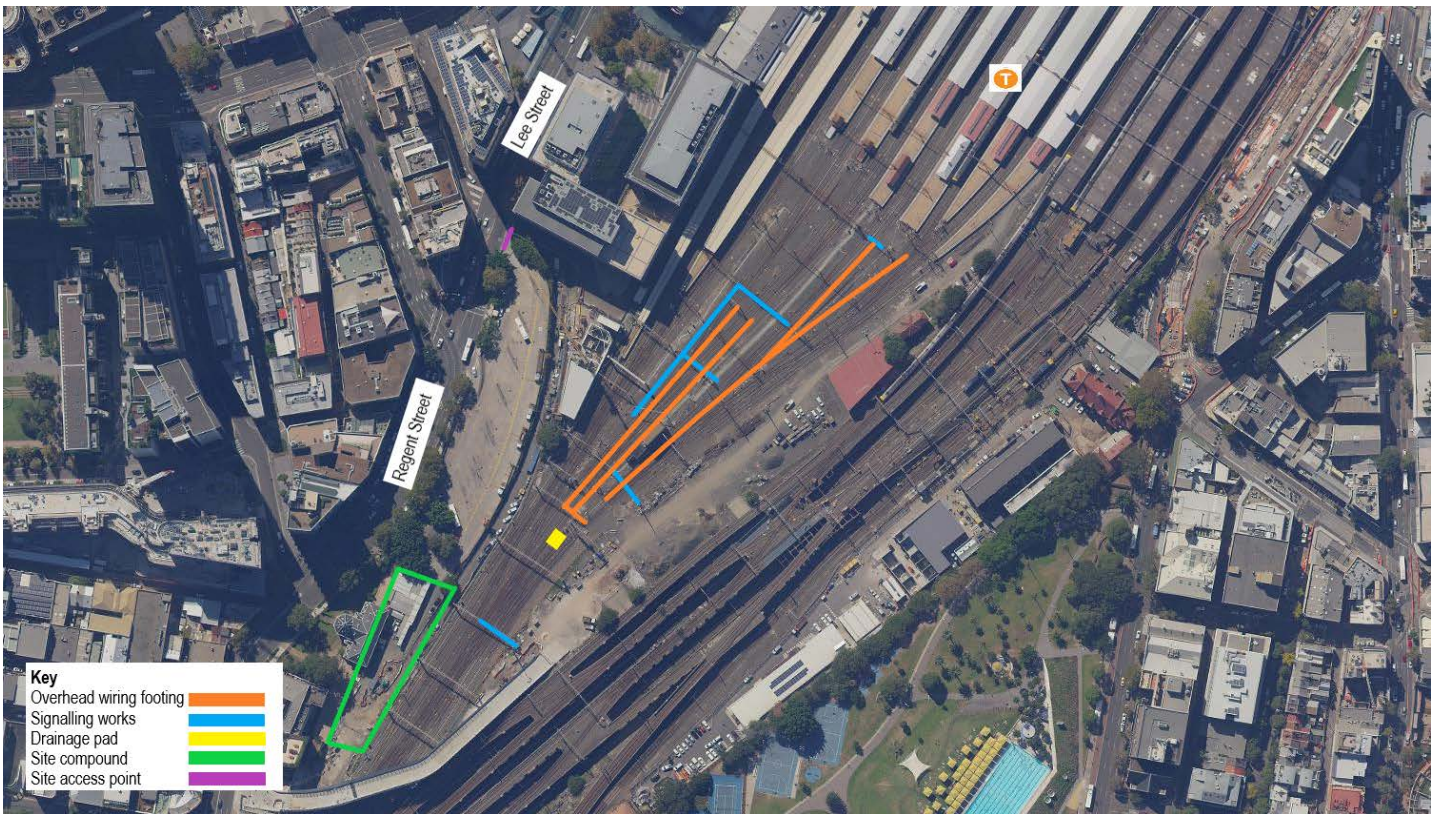

Some additional out of hours work is planned to complete the required work. These works are taking place during a scheduled trackwork period when no trains will be running. This enables the construction team to safely carry out essential activities inside the rail corridor.

- 6pm, Wednesday 3 February to 7am, Thursday 4 February
- 2am, Saturday 6 February to 2am, Monday 8 February.

These works are dependent on weather and site conditions and are subject to change.

Will alternate transport services be running during scheduled track work?

For up to date information about replacement services during this scheduled trackwork period please visit transportnsw.info or call 131 500.

Where will work take place?

The above map shows the project area in the Central Station intercity train yard. The project site compound is located at Mortuary Station.

This work is an essential stage in transforming the rail network in this area so that train services can be improved in the future.

How do we consider the community?

The project team understands construction activities may cause disruption for the community and we will seek to minimise impacts as much as possible. We will put strategies in place to ensure strict adherence to environmental conditions relating to noise, vibration and dust management.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simpler, more reliable network.

How are we staying safe?

Slowing the spread of Coronavirus and ensuring the safety of our staff and the community is a high priority. In line with government guidelines all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.
