

# More Trains, More Services

## Sydney Terminal Area Reconfiguration Project - Erskineville

### What happened in November?

During November, we continued with site investigations and survey work between Sydney Terminal and Macdonaldtown Stabling Yard. The project team established sites for equipment and material storage for efficient work practices and installed a signal distribution box for the T4 train line at Eveleigh.

### What's planned next?

During December, we will carry out the following activities:

- installation of the overhead wiring masts
- utility trenching
- welding tracks
- oversize deliveries of rail infrastructure
- track removal and replacement.

Construction activities will generally be undertaken during standard construction hours from 7am to 6pm Monday to Friday, and 8am to 1pm on Saturday.

### Are there activities planned out of hours?

Some out of hours work is planned to complete the required work. This will take place during scheduled trackwork periods when no trains will be running.

This enables the construction team to safely carry out essential activities inside the rail corridor.

- **8pm, Wednesday 2 to 7am, Thursday 3 December**
- **2am, Saturday 12 to 2am, Monday 14 December.**

We will be taking advantage of the quiet train period in December to do extra work.

### What does this mean for you?

**We will be working for five consecutive days and nights:**

- **2am, Saturday 26 to 2am, Thursday 31 December**

This work is required to install essential infrastructure that will assist in transforming the rail network along this line in the future.

Environmental assessment indicates that this will be noisy for some residents. We will be contacting those directly impacted by this work.

For up to date information about replacement services during this scheduled trackwork period please visit [transportnsw.info](http://transportnsw.info) or call 131 500.

### Where will work take place?

The above map shows the project area inside the rail corridor including both site compounds in Eveleigh. The site access points are on Swanson Street and Railway Parade.

There are a number of other project teams (Transport for NSW and Sydney Trains) working between Macdonaldtown and Eveleigh on these scheduled track work weekends. Residents may notice increased activity as projects strive to achieve optimal project outcomes during this time.

### How do we consider the community?

The project team understands construction activities may cause disruption for the community and we will seek to minimise impacts as much as possible.

We will also ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

### How are we staying safe?

We continue to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

### Will alternate transport services be running during schedule track work?

For up to date information about replacement services during this scheduled trackwork period please visit [transportnsw.info](http://transportnsw.info) or call 131 500.
